ENVIRONMENTAL PROFESSIONAL STATEMENT¹

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in §312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Angel García MSE PE
Environmental Engineer

1.0. SUMMARY

The Puerto Rico Convention Center District Authority (“PRCCDA”), through their legal counsel, Pico & Blanco Attorneys at Law PSC (the “Client”), has authorized AGE to perform a Phase I Environmental Site Assessment (“ESA”) at a parcel of land (the “Property”), located at the south and west limits of the Puerto Rico Convention Center District (“PRCCD”), in the Municipality of San Juan, Puerto Rico. The Property is subject to a due diligence process by the PRCCDA pursuant to the potential acquisition of this parcel of land.

This report describes the services performed, the results obtained, and AGE’s interpretation of these results of the Phase I Environmental Site Assessment in accordance with the American Society for Testing Materials (“ASTM”) Standard Practice E 1527-05.

This investigation did not address any investigation related to radon, Asbestos Containing Materials (“ACM”) or Lead-Based Paint (“LBP”), lead in drinking water or wetland identification. However, AGE will let the Client know if during the investigation comes evidence to support carrying out any of the above studies.

This assessment has revealed no evidence of recognized environmental conditions (“RECs”) in connection with the Property, except for the following:

1. The former PR General Services Administration gas station has two 25,000-gallon USTs that were never closed pursuant to EQB regulations. These USTs are leaking, according to the EQB database, which makes undertaking the closure of this facility a first-priority task.
2. The Autoridad de los Puertos de Puerto Rico (EQB Facility Number 2-920085) UST is considered a REC in connection with current uses of the Property, or adjoining properties, that warrants further study.
3. Based on historical data, two locations within the Property were used as disposal sites in the past. Specifically, the Miramar Equestrian School and the PR Fire Department Training Center sites warrant further characterization to assess the presence and extent of soil and groundwater contamination.
4. A 60-year old underground conveyance system used to distribute aviation and motor fuel to various facilities inside the Property appears to be still in place although abandoned decades ago. This structure represents a potential source of contamination to the soil and groundwater at the Property and would require further characterization.
5. The closure status of Site 36 is still pending review by the EQB, according to its records.

6. Several instances of stained soil or pools of liquid that suggest an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the ground, ground water, or surface water of the Property have been recorded and warrant further investigation. Please refer to Section 8.0 for details.
7. Unidentified and labeled containers ranging from 1-gallon to 225-gallon plastic and metal units were observed at the several locations within the Property (please refer to Section 8.0 for details). No additional information regarding potential impacts to the soil and groundwater potentially brought about by releases at these locations is available and would require further investigation after proper characterization and disposal of these containers is achieved.
8. Use of asbestos-containing materials and lead-based paint as construction materials is widespread throughout most of the Property, prompting a Property-wide abatement program.
9. Various sites within the Property show signs of filling or grading by non-natural causes suggesting solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal and would require further characterization. Please refer to Section 8.0 for details.
10. A structure of what appears to be a drainage channel system traverses the Viva Carpets / Metal Building Contractors building. This system is not in operation and most of the segments comprising it are covered with concrete slabs, preventing a thorough assessment of its purpose and condition. It has also been considered a REC in connection with historical uses.

2.0. INTRODUCTION

Pico & Blanco Attorneys at Law PSC (the “Client”), has authorized AGE to perform a Phase I Environmental Site Assessment (ESA) on behalf of the Puerto Rico Convention Center District Authority (“PRCCDA”) at a parcel of land located southwest of the PR Convention Center main facility, in the Municipality of San Juan, Puerto Rico. The Property has been identified as “Parcel L”, and consists of a remnant parcel from what is known as “Commonwealth Parcel” and includes parcel 200-02 as per a land survey and segregation plans developed 1990-1991 by the PR Land Administration and CSA Group in 2010. The subject property consists of approximately 74 cuerdas² and was part of the former Miramar Naval Station facilities in the Municipality of San Juan. Please refer to Figure 2-1 through Figure 2-3 for location details and topographic survey.

This report describes the services performed, the results obtained, and AGE’s interpretation of the results of this Phase I Environmental Site Assessment in accordance with the American Society for Testing Materials (ASTM) Standard Practice E 1527-05.

2.1. Background

On January 11, 2002, President Bush signed the Small Business Liability Relief and Revitalization Act (“the Brownfields Law”). In general, the Brownfields Law amends the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and provides funds to assess and clean up brownfields sites, clarifies CERCLA liability provisions for certain landowners, and provides funding to enhance State and Tribal cleanup programs. The Brownfields Law requires EPA to develop regulations establishing standards and practices for how to conduct what is known as *all appropriate inquiry*. The term *all appropriate inquiry* refers to the requirements for assessing the environmental conditions of a property prior to its acquisition.

Subtitle B of Title II of the Brownfields Law revises some of the provisions of CERCLA Section 101(35) clarifying the requirements necessary to establish the *innocent landowner* defense under CERCLA in addition to providing Superfund liability limitations for *bona fide prospective purchasers* and *contiguous property owners*. Among the requirements added to CERCLA is the requirement that such parties undertake “*all appropriate inquiry*” into prior ownership and use of a property at the time at which a party acquires the property.

- Bona fide prospective purchasers who buy property after January 11, 2002 must perform all appropriate inquiry prior to purchase and may buy knowing, or having reason to know, of contamination on the property

² 1 cuerda ≈ 0.97 acre.

while still enjoying the limitation on liability provided by the new definition.

- Contiguous property owners whose property is not the source of the contamination, but is "contiguous" to a facility that is the source of contamination found on their property must perform all appropriate inquiry prior to purchase and buy not knowing, or having reason to know, of contamination on the property.
- Innocent purchasers/landowners must perform all appropriate inquiry prior to purchase of a property and must do so without knowing, or having reason to know, of contamination on the property.

The law set two different interim standards for conducting "all appropriate inquiry" that apply depending on the date the property was purchased. These standards will remain in effect until EPA promulgates final federal standards.

1. Properties purchased prior to May 31, 1997: The law provides that a court shall consider the following when making a determination with respect to a defendant: specialized knowledge or experience of the defendant, relationship of the purchase price to the value of uncontaminated property, commonly known information about the property, obviousness of contamination, and the ability of the defendant to detect contamination by appropriate detection.
2. Properties purchased after May 31, 1997, the law requires the use of procedures developed by the American Society for Testing Materials (ASTM), in particular ASTM's standard E1527-05, or "*Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process*". In the final rule "*Clarification to Interim Standards and Practices for All Appropriate Inquiry Under CERCLA and Notice of Future Rulemaking Action*", EPA establishes that the current ASTM standard, E1527-05, will also meet the "all appropriate inquiry" requirement for site characterizations and assessments.

2.2. Purpose

The purpose of this Phase I ESA is to conduct an environmental due diligence inquiry pursuant to good commercial and customary practice, as established by the procedures stated in the ASTM Standard Practice E 1527-05.

The purpose of this practice is to meet the "all appropriate inquiry" requirement for a site characterization and assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of CERCLA (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA

liability (hereinafter, the “*landowner liability protections*”, or “*LLPs*”): that is, the practice that constitutes “all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35) (B). Controlled substances are not included within the scope of this standard practice.

The goal of the processes established by this practice is to *identify recognized environmental conditions*. The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

2.3. Detailed Scope of Work

The scope of this effort was to conduct a Phase I ESA of the subject parcel of land in general accordance with the ASTM Standard Practice E 1527-05, except as otherwise stated herein. AGE reviewed selected public records and historical information in connection with the Property, and adjacent properties, performed a visual assessment of the site, interviewed individuals knowledgeable of the uses and physical characteristics of the Property and of the general area where the Property is located, and summarized in this report all of the information obtained.

2.4. Significant Assumptions

The accuracy and completeness of record information varies depending on the source. Therefore, unless AGE has actual knowledge that certain information is incorrect, or unless it is obvious that certain information is incorrect in light of other information at the disposal of AGE at the time of this assessment, AGE will assume that the information provided by others for consideration as part of this assessment is correct. AGE may rely on such information, as appropriate, for the purpose of determining any findings, opinions, or conclusions as part of this Phase I ESA.

2.5. Limitations and Exceptions

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the Property. Performance of a Phase I ESA in accordance with the ASTM Standard Practice E 1527-05 is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with the Property, recognizing reasonable limits of time and costs. AGE does not warrant that documents, records, interviews or reports prepared or carried out by others, not under the direction of AGE, that were used to determine the findings, opinions, or conclusions of the Phase I ESA are accurate or up to date.

This Phase I ESA did not involve any testing or sampling; therefore, AGE will not be responsible for latent environmental conditions which are not obvious during the assessment and come to light sometime after the assessment is completed.

2.6. Special Terms and Conditions

This report has been prepared on behalf of and for the exclusive use of the Client for the purpose described in the introduction to this report. This report and the findings, conclusions, observations, specifications, or data contained in it shall not, in whole or in part, be disseminated or conveyed to any other party nor used by any other party without the express written consent from AGE. However, AGE recognizes that the Client may convey this report to the Seller and, when applicable, the Lender associated with a potential real estate transaction.

2.7. User Reliance

This Phase I ESA was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area. AGE observed the degree of care and skill generally exercised by other consultants under similar circumstances and conditions. AGE's findings and conclusions must be considered not as scientific certainties, but rather as our professional opinion concerning the significance of the limited data gathered during the course of the Phase I ESA. No other warranty, express or implied, is made. Specifically, AGE does not and cannot represent that the property subject to this Phase I ESA contains no hazardous substances or petroleum products, as defined in the ASTM Standard Practice E 1527-05, or other latent condition beyond that observed by AGE during this assessment.

Consistent with the ASTM Standard Practice E 1527-05, the records search performed for this Phase I ESA was limited to reasonably ascertainable information; that is, information that is:

⇒ Publicly available,

- ⇒ Obtainable from its source within reasonable time and cost constraints,
and
- ⇒ Practically verifiable.

Observations made during the Property and vicinity reconnaissance were limited to those obvious visual and physical observations made while walking through the Property or driving through the immediate vicinity of the Property.

3.0. SITE DESCRIPTION

3.1. Location and Legal Description

The Property is located southwest of the PRCCD, in the Municipality of San Juan, Puerto Rico. Figure 3-1 depicts the Facility Plan for the developed area of the Property.

The subject property consist of approximately 74.1088 cuerdas³, this parcel was part of the Naval Station in the Municipality of San Juan. The former NAS San Juan is located at the Isla Grande peninsula in San Juan, Puerto Rico, and is bordered on the south and west by the San Juan Bay. The facility is approximately 500 acres in area and was occupied by the U.S. Navy from 1898 to 1971. The site was utilized as an NAS until March 1971. The U.S. Navy constructed a complete NAS at this location, which consisted of 187 buildings, including housing, dispensary, school, barracks, hangars, runways, wharfs, storage and supply warehousing, administrative buildings, and various utility facilities. In 1991, ownership of the land reverted to the Commonwealth of Puerto Rico.

According to the Municipality of San Juan Property Registry, the Property is identified as property # 21290 located at the Santurce Sur ward. The Property description follows.

Remnant:

Parcel of land consisting of the following two (2) portions located in the South Section of the Santurce Ward of the Municipality of San Juan, Puerto Rico, consisting in the aggregate of an area of three hundred fifteen thousand nine hundred ninety one square meters with zero one hundred twenty four ten thousandths of another square meter (315.991.0124 sq. mts.), equivalent to eighty cuerdas with three thousand nine hundred sixty-eight ten thousandths of another cuerda (80.3968 cdas.):

(A) Parcel of land of irregular shape located in the south Section of the Santurce Ward of the Municipality of San Juan, Puerto Rico identified as Parcel two hundred hyphen zero two (200-02) in the segregation plan dated on the fifth (5th) day of September, two thousand two (2002) prepared by Engineer Peter L. Martinez license number seven thousand one hundred fifty-seven (7.157) with an area of twenty four thousand seven hundred sixty nine square meters with six hundred twenty six ten thousandths of another square meter (24,769.0626 sq. mts.) equivalent to six cuerdas with three thousand nineteen ten thousandths of another cuerda (6.3019 cdas.), bounding on the NORTH with the Lindbergh street; on the SOUTH with Old Naval Base Access Road; on the EAST with

³ 1 cuerda ≈ 0.97 acre.

parcel of land identified as Parcel two hundred hyphen zero three (200-03) in the same Segregation Plan; and on the WEST with parcel of land identified as Parcel two hundred hyphen zero one (200-01) in the same Segregation plan.

(B) Parcel of land of irregular shape located in the south section of the Santurce Ward of the Municipality of San Juan, Puerto Rico consisting of two hundred ninety one thousand two hundred twenty one square meters with nine thousand four hundred ninety nine thousandths of another square meter (291,221.9499 sq. mts.) equivalent to seventy four cuerdas with nine hundred forty nine ten thousandths of another cuerda (74.0949 cdas.) bounding on the NORTHEAST with the following tracts of land: (i) land dedicated to public use known as the Caguax street; (ii) lands of the Manuel Fernandez Juncos Orphanage; and (iii) lands of the Miramar Juvenile Correction Facilities; on the NORTHWEST with the following tracts of land: (i) lands of the Puerto Rico Ports Authority on which the main offices of the said Authority are currently located; (ii) portion of land identified as "U.S.A. PARCEL B" in the segregation plan dated on the fifth (5th) day of September. two thousand two (2002) prepared by engineer Peter L. Martinez, License number seven thousand one hundred fifty seven (7.157); (iii) parcel of land identified as Parcel two hundred hyphen zero one (200-01) in the same Segregation Plan; and (iv) with submerged lands of the San Juan Bay; on the SOUTHEAST with (i) parcel of land identified as "U.S.A. PARCEL A" in the same Segregation Plan and (ii) lands owned by the United States Navy; and on the SOUTHWEST with (i) waters of the San Juan Bay; (ii) parcel identified as "U.S.A. Parcel B" in the same Segregation Plan; and (iii) parcel identified as "U.S.A. Parcel A" in the same segregation plan.

Parcels 200-01, 200-03, 200-04, 200-05, 200-06A and 200-06B are owned by THE PUERTO RICO CONVENTION CENTER DISTRICT AUTHORITY.

3.2. Site and Vicinity General Characteristics

According to the Municipality of San Juan Land Use Plan, which became effective on March 13, 2003, land use within the Property is mostly classified as Public Use (D). This classification is intended for education, health, culture, and social health public services. There is a parcel of land that corresponds to the historical structure known as *Polvorin de Miraflores* that has been classified as Conservation and Restoration of Historical Resources (CR-H). This classification is intended for properties of historical, architectural or cultural significance.

Flood studies from the area have been carried out by the Federal Emergency Management Agency (FEMA). According to FEMA's Flood Insurance Rate Map,

Number 72000C0355H, effective April 19, 2005, the land where the Property sits is not located within any flood zone.

3.3. Current Use of the Property

Current uses of the Property include container yards, parking lots, administrative offices, commercial and light-industrial operations, which are carried out by private companies and/or governmental agencies. Lands are currently managed by the Puerto Rico Ports Authority (PRPA) or by the Puerto Rico Department of Transportation and Public Works (DTPW). About half of the structures comprising the Property are unoccupied and abandoned.

3.4. Structures, Roads and Other Improvements to the Site

The parcel includes several structures used for commercial and light-industrial purposes, parking lot areas, undeveloped lots, and offshore locations. About half of the assessed areas are currently vacant. Asphalt roads were built as part of the Isla Grande Former Naval Air Station. Access to the Property is through state road PR-35. No recent improvements were observed at the site.

3.5. Current uses of Adjoining Property

The Property is bound to the north by the PRCCD, to the south by the Crowley container yard, managed by the PRPA, to the east by the Puerto Rico Convention Center District, and to the west by Ribas Dominicci (Isla Grande) Airport and the Harbor Zone.

PHASE I ENVIRONMENTAL SITE ASSESSMENT AT REHABILITATION
PARCELS 289-02 AT THE PROCOIA, SAN JUAN, PR

FACILITY PLAN

4.0. USER PROVIDED INFORMATION

4.1. Information Reported by the User Concerning Environmental Liens or Activity and Use Limitations, or Specialized Knowledge or Experience

The Client did not provide AGE any currently recorded environmental liens or activity and use limitations against the Property. The Client did not provide AGE with any other information concerning any specialized knowledge or experience that is material to recognized environmental conditions in connection with the Property.

4.2. Specialized Knowledge

The Client did not provide AGE with any other information concerning any specialized knowledge or experience that is material to recognized environmental conditions in connection with the Property.

4.3. Valuation Reduction for Environmental Issues

The Client did not provide AGE any information supporting a potential valuation reduction of the Property due to existing or historical environmental liens at the Property.

4.4. Owner, Property Manager, and Occupant Information

In 1991, ownership of the Property reverted to the Commonwealth of Puerto Rico after the US NAVY, Coast Guard and other military facilities moved out of the Property after more than 60 years of uninterrupted possession. The Government of Puerto Rico is the fee owner of the Property and, pursuant to Act No. 12 of December 10, 1975, as amended, the Property is under the custody of the Department of Transportation and Public Works (DTPW) which administers the Property.

Most of the existing structures within the Property are empty, or abandoned. Most of the occupied facilities assessed within the Property operate under a lease agreement with the Puerto Rico Ports Authority.

As part of the Phase I ESA, the Property was divided into 31 separate lots in order to ease the process of identifying recognized environmental conditions in connection with the Property. Each one corresponds to a discrete operation, structure or space within the Property. Details are provided in the following table.

TABLE 4-1. SUMMARY OF PROPERTY OCCUPANTS AND ASSESSED LOTS

Property	Description
1	Hangar No. 12 PW Office & Maintenance Shop
2	Viva Carpet Warehouse
3	Metal Building Contractor Inc.
4	La Casa del Techero Inc.
5	Former Puerto Rico General Services Administration Gas Station
6	Precision Marine
7	Puerto Rico Ports Authority SIAAME Office
8	Former Commissary and Navy Exchange
9	Caribe Techno Corporation
10	Trans Caribbean Marine
11A	Former Pan American Olympic Gymnasium
11B	Parking Lot
12	Abandoned Structure
13	Former Marine Barracks
14	Former Marine Barracks
15	Former Marine Barracks
16	Former Marine Barracks
17	Former Banco Popular & Harbor Bunkering Corp. and Aqua Clean Ships Caribe, Inc.
18	Former Bomberos de Puerto Rico
19A	Concreteras de Puerto Rico
19B	Del Valle Construction lot
19C	Empty Lot near Piers 15-16
20	Container Yard I
21	Container Yard II
22	Miramar Equestrian School
23	Former "Departamento de la Familia" child care
24	Polvorin de Miraflores
25A	Former GPO Recreation Building
25B	Former Quarters
25C	Former Quarters and GPO Storehouse
26	Academia de Bomberos de Puerto Rico

4.5. Reason for Performing Phase I

The purpose of this practice is to meet the "all appropriate inquiry" requirement for a site characterization and assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of CERCLA (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to allow the PRCCDA to satisfy one of the requirements to qualify for the *contiguous property owner* or *bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*", or "*LLPs*"): that is, the practice that constitutes "all appropriate inquiry into the previous ownership and uses of

the property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35) (B).

Even though CERCLA does not generally apply to petroleum products, petroleum products are included within the scope of this Phase I ESA because they are of concern with respect to many parcels of commercial real estate and current custom and usage is to include an inquiry into the presence of petroleum products when doing an environmental site assessment of commercial real estate.

5.0. RECORDS REVIEW

5.1. Standard Environmental Record Sources

As part of this Phase I ESA, AGE contracted the services of Environmental Data Resources (EDR®), Inc. to review the required federal and state databases for records regarding possible hazardous material handling, spills, storage, production, etc. at the Property or in the vicinity of the Property that could constitute a recognized environmental condition. Records from EDR® are organized by Zip code. The Zip codes applicable to the area within the municipality of San Juan where the Property sits are 00901, 00906, 00907 and 00908. All of the record search distances pursuant to ASTM Standard Practice E 1527-05 fall within the mentioned zip codes. Zip codes 00901 and 00906 were discarded because they belong to the Puerta de Tierra and Old San Juan areas, located across the San Antonio Channel.

However, to check for possible errors in the use of zip code, the zip code for the San Juan area, 00907 and 00908, were also checked using the (EPA) Envirofacts® database (www.epa.gov) to search the NPL site list, the RCRA CORRACTS TSD facilities list, the RCRA Large Quantity Generators List, and the RCRA Small Quantity Generators List.

In addition to the databases reviewed by EDR® and the USEPA Envirofacts database records reviewed, AGE also reviewed the Puerto Rico Solid Waste Management Authority (SWMA) lists of active and inactive landfills in Puerto Rico, and the Environmental Quality Board's latest List of Leaking Underground Storage Tanks (LUSTs), and List of Registered Underground Storage Tanks (USTs).

The results of the EDR® and USEPA Envirofacts® database searches are included in Appendix B, and are summarized in the following sections. The information provided by SWMA has been incorporated in Section 5.1.9.

5.1.1. *U.S. Environmental Protection Agency (EPA) National Priority List (NPL)*

No currently listed or de-listed NPL sites were identified by the databases consulted within a 1-mile radius of the Property.

5.1.2. *U.S. EPA Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)*

No CERCLA sites were identified within a 1/2-mile radius of the Property.

5.1.3. *CERCLIS No Further Remedial Action Planned (NFRAP) Site List*

Three currently-listed CERCLA NFRAP sites were identified within ½-mile radius of the Property.

- US Navy Naval Sea System Perez & Co. PR (Site ID 0203314), located at Miramar, San Juan, Puerto Rico. On June 27, 1991, the USEPA recommended to archive the site with no further action planned.
- Army Air Support Facility (Site ID 0204086), located at San Juan, Puerto Rico. On April 22, 1997 the USEPA recommended to archive the site with no further action planned.
- New Army Aviation Support (Site ID 0204194), located at Isla Grande in San Juan, Puerto Rico. After a Federal Facility Preliminary Assessment Review conducted at this location, the USEPA recommended archiving the site with no further action planned on August 30, 1999.

5.1.4. *U.S. EPA Resource Conservation and Recovery Act (RCRA) Corrective Actions (CORRACTS) Treatment Storage and Disposal (TSD) Facilities List*

No RCRA CORRACTS TSD facilities were identified by the databases consulted within a 1-mile radius of the Property.

5.1.5. *U.S. EPA RCRA Non-CORRACTS TSD Facilities List*

No RCRA non-CORRACTS TSD facilities were identified by the databases consulted within a ½-mile radius of the Property.

5.1.6. *U.S. EPA RCRA Generators List*

No RCRA Large Quantity Generator (LQGs) or Small Quantity Generators (SQGs) were identified within the Property or adjoining properties.

5.1.7. *Local Brownfield Sites*

No Brownfield sites were found within ½ mile of the subject site, according to EQB records.

5.1.8. *Federal Emergency Response Notification Systems (ERNS) List*

The ERNS database record all the phone calls made to the National Response Center (NRC). The NRC is notified when any one of a number of different types of accidental spills or releases of toxic substances happens. This includes oil and CERCLA releases. No reports have been filed for this Property.

5.1.9. *State List of Hazardous Waste Sites Identified for Investigation or Remediation (State-Equivalent NPL or CERCLIS Site Lists)*

To date, Puerto Rico has no State-equivalent Superfund program. The purpose of Superfund Program of the Puerto Rico Environmental Quality Board (EQB) is to assist in the implementation of the Federal program.

5.1.10. *State Landfill/Solid Waste Disposal List*

AGE reviewed the Puerto Rico Solid Waste Management Authority lists of active and inactive landfills in Puerto Rico. According to PRSWMA, the closest solid waste landfill to the Property is the Carolina landfill, located approximately 15 km to the east of the Property.

5.1.11. *State Leaking Underground Storage Tank (LUST) List*

As of March 2008, the EQB LUST list identifies three (3) facilities within ½ mile of the Property.

- San Juan Gas Company (EQB Facility Number 94-0162), located at San Juan, Puerto Rico.
- Estación de Gasolina G.S.T. (EQB Facility Number 86-0076), located at Majagua St, Building # 16, Administración Servicios Públicos, San Juan, Puerto Rico.
- ESSO S/S Co.-035 (EQB Facility Number 86-1134), located at Miramar, San Juan, Puerto Rico. Released on June 6, 2002.

5.1.12. *State Registered Underground Storage Tank (UST) List*

As of January 2008, the EQB UST list and the EDR® database identifies one UST located at the 00907 and 00908 zip codes. The information on this facility follows.

- Autoridad de los Puertos (EQB Facility Number 2-920085), located in Isla Grande, San Juan, Puerto Rico. According to both databases consulted the tank is currently in use.

5.2. *Additional Environmental Record Sources*

No additional environmental record sources were consulted as part of this assessment.

5.3. *Physical Setting Source(s)*

As part of this Phase I ESA, AGE reviewed the current 7.5-Minute United States Geological Survey (USGS) Topographic Map for San Juan (USGS 1969, Photo-

revised 1982). Topography of the area under study is generally flat with elevations fluctuating from 1 to 5 meters above mean sea level (msl), with the exception of a rather small elevation towards the south, topping at about 5 meters above msl. Most of the Property is developed and used primarily for port-related affairs and light-industrial purposes, although roughly about half of the structures at the site are abandoned.

The USGS Topographic Map was examined to estimate groundwater movement. Both local and regional groundwater appears to flow in a south-southwest fashion towards the Bahia de San Juan.

5.4. Historical Use Information on the Property and Adjoining Properties

5.4.1. *Aerial Photographs*

As part of this Phase I ESA, AGE obtained for review aerial photographs for the years 1937, 1951, 1971, 1981, 1991, and 2006 from the Puerto Rico Highway and Transportation Authority to assess the development and activities of areas encompassing the Property over time. A brief description of the observations obtained from each of these photographs is provided in the following paragraphs.

The photograph taken on April 18, 1937 shows that the subject property undeveloped, except of some structures observed at the northwest and the southeast of the Property, presumably of residential nature. The aerial photograph taken on 1937 shows evidence of systematic filling of wetlands starting during the 1930's until the 1940's, when the Property was developed to conditions very similar to those found today in order to make room for the construction of a US Naval Station. The area where the Property and adjacent parcels is located was filled during the expansion of the US Naval Base during World War II. Construction activities began in September 1940 and continued until 1943. During this expansion, approximately 340 acres of swampy area were filled and developed into the Naval Station San Juan.

A photograph taken on February 4, 1951 shows most of the Property developed. This photograph clearly shows extensive improvements to the Property, which includes the following infrastructure:

- Two piers
- Two steel hangars
- Chapel
- Marine Barracks Buildings
- Parking
- Public Works

- Commissary & Navy Exchange
- Storehouses
- Fire Station and Garage
- Land Plane Hangar, and
- Residential Complex

A photograph taken on May 5, 1971 shows very few infrastructure improvements when compared to that of 1951. However, it appears from the photograph that the facility was experiencing a high level of activity related to its military purpose.

The March 19, 1981 aerial photograph is very similar to the 1971 photo with the exception that the Isla Grande Airport, west of the Property shows marked improvements. This picture also suggests that military activities at the facility were declining markedly during this period. A photograph dated on September 26, 1991 shows a similar scenario in comparison with the photograph of 1981 with the exception of additional improvements to the airport.

Finally, a February 13, 2006 photo of the Property shows the former residential complex north of the Property completely demolished and replaced by the PR Convention Center main structure. The Property appears unchanged when compared to the 1991 photograph.

5.4.2. *Historical Use Information on Adjoining Properties*

Although specific sources of historical use on adjoining properties were not reasonably ascertainable, aerial photographs from 1937 until 2006 were examined in order to obtain a general idea of the development of the Isla Grande sector. All surrounding areas to the Property have evolved in a similar fashion as the subject Property. First, during the 1930's to the 1950's when, after a period of modifications to the original topography of the Isla Grande sector, the military complex was built, reaching its height up to the 1970's. After that, changes to the surrounding infrastructure were limited to that of the airport and various parcels turned into container yards in support of the port facilities. Finally, the area experienced its most significant change in decades when the PR Convention Center District started construction in the late 90's. All throughout, adjoining properties have been mostly used for military and light industrial purposes since the original development in the 1930's, with the exception of the PR Convention Center development, which brought the hospitality and tourism sectors to the Isla Grande peninsula.

5.4.3. *Fire Insurance Maps*

No historical fire insurance maps were found for the period since 1940 to the present that covers the area where the Property is located.

5.4.4. *Property Tax Files*

Property tax files, including a cadastral map of the Property, were examined as part of this Phase I ESA. The information included in said documentation was not deemed significant to recognized environmental conditions in connection with the property or adjoining properties.

5.4.5. *Recorded Land Title Records*

Recorded Land Title Records were examined as part of this Phase I ESA. The information included in said documentation was not deemed significant to recognized environmental conditions in connection with the property or adjoining properties.

5.4.6. *Historical U.S. Geological Survey Topographic Maps*

Historical U.S. Geological Survey Topographic Maps were not reviewed since they were not judged to provide sufficiently useful, accurate, or complete information concerning previous uses of the Property or adjoining Property that could not be ascertained from other historical sources reviewed for this Phase I ESA.

5.4.7. *Local Street Directories*

Local street directories are directories published by private (or sometimes government) sources that show ownership, occupancy, and/or use of sites by reference to street addresses; most common of these are the “reverse telephone directories” that are organized by a street address followed by the occupant or business name, and then the phone number.

AGE contacted ITT World Directories offices in San Juan to determine the availability of street directories (phone books organized by street address rather than by last name/business name). *ITT World Directories* confirmed that no street directories have ever been available for Puerto Rico.

5.4.8. *Building Department Records*

Building department records means those records indicating permission of the local government to construct, alter, or demolish improvements on the Property. Given the time and cost limitations, and that available site plans and interviews with the owner can also be used to obtain this information, these records were

excluded from this assessment. In addition, lands owned by the Federal Government are exempt from the jurisdiction of the Puerto Rico Planning Board and the Rules and Permits Administration. Since the Property was a former Naval Air Station (“NAS”), there are no permitting building records.

5.4.9. *Prior Environmental Studies*

Several environmental studies have been conducted in the past by federal and local agencies at the Isla Grande Former Naval Air Station. However, most of the available documentation was not reasonably ascertainable. However, the US ARMY Corps of Engineers provided copies of the following documents for our review as part of this assessment. General details on the findings of these studies are also provided in the following paragraphs:

5.4.9.1.	Underground Storage Tank Closure Plan Miscellaneous Underground Storage Tank Sites Former Naval Air Station San Juan, San Juan, PR, March 2007
----------	--

In March 2007, the U.S. Army Corps of Engineering (USACE) prepared a draft plan for the closure of two (2) suspicious 25,000-gallon Underground Storage Tanks (UST) located at the Property.

5.4.9.2.	Former Transformer & Battery Storage Area Investigation Work Plan, Former Naval Air Station San Juan, San Juan, August 2008
----------	--

In August 2008, the U.S. Army Corps of Engineer (USACE) prepared a work plan to further investigate a former transformer and battery storage area to determine the nature of soil contamination associated with past activities. Another objective was to determine the waste characteristic of any impacted soil.

These two (2) areas are located 700 feet southeast of former building number 21 “East Seaplane Hangar No. 2 C.G” at the boundary with the Academia de Bomberos de Puerto Rico.

5.4.9.3.	Installation-Wide Sampling and Analysis Plan for the Former Naval Air Station (NAS) San Juan, San Juan, Puerto Rico, March 2007
----------	---

In March 2007, the U.S. Army Corps of Engineer (USACE) prepared an Installation Wide Sampling and Analysis Plan for the Former Naval Air Station (NAS) San Juan. The Isla Grande Naval Air Station was divided into two (2) separate tracts of land with separate ownership and control: The Puerto Rico Port Authority (PRPA) property and the General Services Administration (GSA) property.

PRPA properties investigated under the work plan included the following:

- Small Arms Range

- Scrap Disposal Area
- Ferry Maintenance Area
- Site 38 (Former Tank Farm composed of 16 tanks of 25,000 gallons/each) - This site is located outside the Property.

GSA properties assessed under the work plan included the following:

- Site 36 (Former Tank Farm composed of 24 Gasoline tanks of 25,000 gallons/each)
- Site 39 (Former Tank Farm composed of 8 Diesel Oil tanks of 25,000 gallons/each)
- Power Plant Assessment, and
- Building 12/PCB Area (Former Public Work Offices & Maintenance Shop)

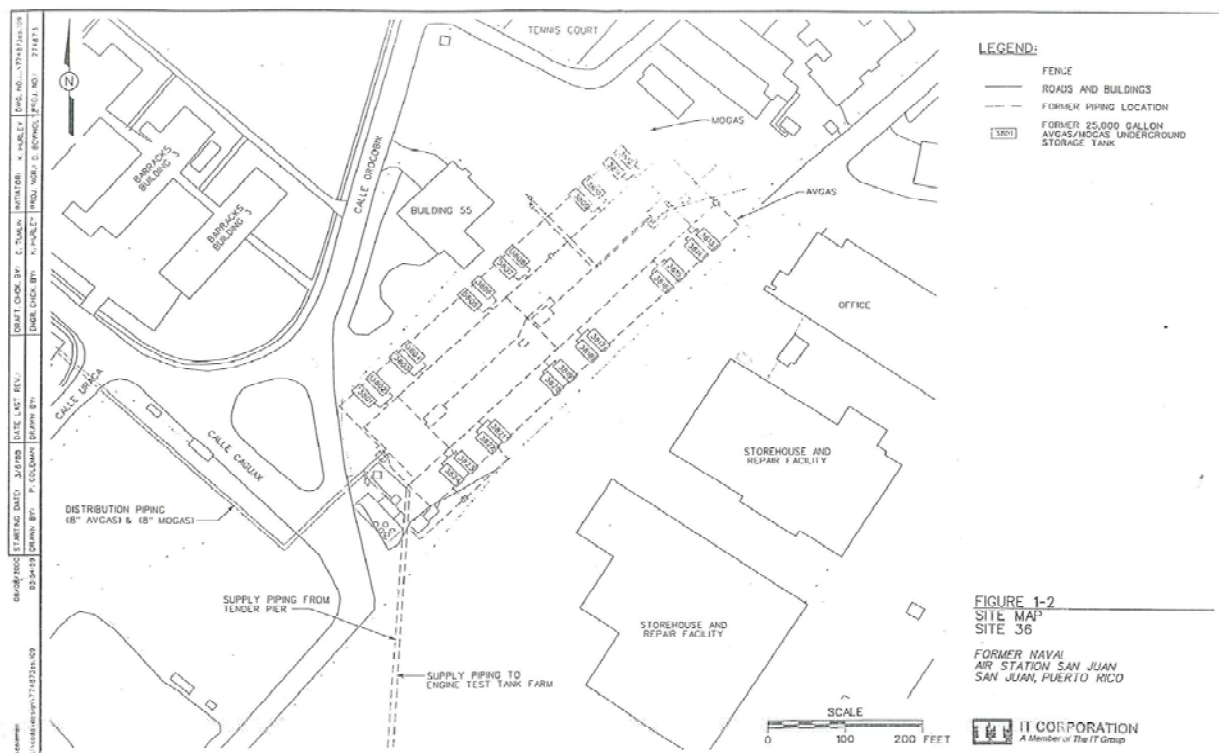

5.4.9.4. Site 36 UST Contamination Assessment Report Former Naval Air Station San Juan, Puerto Rico, IT Corporation, August 2000.

The objectives of study were to conduct a UST contamination assessment (CA) to characterize potentially contaminated soils and to define the extent of soil and groundwater contamination resulting from historical releases of motor gasoline (MOGAS) and aviation gas (AVGAS) from 24 former USTs at Site 36 (Figure 5-1). Soil and groundwater samples have been collected and analyzed to determine if past releases from the USTs at Site 36 pose a threat to human health and the environment. Data from the CA was compared to screening levels to evaluate the need for additional investigations and/or corrective actions at the site, in accordance with the Program for the Control of Underground Storage Tanks of the PR Environmental Quality Board. The results of this assessment are summarized in the following paragraphs:

- Soil contamination at the site, exceeding screening criteria was present in the area of the former UST pits, fuel distribution lines and associated pump and valve pits.
- Residual free-product was found near the northern corner of the site and downgradient of the entire southeastern edge of the site. The product was typically described as staining and coatings on sand, silt, and clay below the top of the water table in a zone approximately 2 to 2.5 feet thick. Laboratory data indicated this product was severely weathered with no volatile components remaining.
- Low concentrations of Total Petroleum Hydrocarbons, Poly-Aromatic Hydrocarbons, Benzene-Toluene-Ethylbenzene-Xylene, and lead were slightly impacting the groundwater.

- According to the report, the remedial alternative under consideration for the site was risk-based corrective action.
- AGE requested EQB to provide information on this site. A copy of a letter dated on August 8, 2002 was obtained. In said letter, the EQB is requesting the then project managers for the Convention Center District development, CSA Group, to provide clarification on several issues pertaining to this document, which was apparently submitted by CSA to EQB pursuant to a closure of this facility. No other correspondence regarding this issue was obtained from the records search at this agency.

FIGURE 5-1. SITE 36 SCHEMATIC LAYOUT

6.0. SITE RECONNAISSANCE

6.1. Methodology and Limiting Conditions

As part of this Phase I Environmental Site Assessment Process, AGE conducted a site reconnaissance of the Property and general vicinity on March 9, March 24, and March 31, 2010. The site reconnaissance was conducted walking through the Property and driving around its perimeter to identify and observe surrounding properties. Photographs taken during the site reconnaissance visit and activities are included in Appendix C.

6.2. General Site Setting

The Property is located within the Isla Grande Area and consists of approximately 74 cuerdas⁴, and used to be part of the former Miramar Naval Air Station which was built by the filling of wetland areas during the 30's and early 40's, with the main purpose of establishing a military installation at Isla Grande peninsula. Current uses of the remaining infrastructure include warehousing, heavy-equipment shops, governmental office space, service industries, horse stables, parking lots. More than half of the existing infrastructure consists of abandoned buildings.

The Property is bound to the north by the PR Convention Center District, to the south and east by Ports Authority container yards, to the west by the Harbor Zone.

Past uses of adjoining properties supported the military infrastructure established in the area, and include military housing, warehouses, administrative offices, repair shops and exercise grounds. According with the aerial photograph of the 30's, the area was filled with artificial fill in order to develop what is known as the Miramar Naval Air Station. In 1991, ownership of the Property was reverted to the Commonwealth of Puerto Rico. In the late 90's, construction of the Puerto Rico Convention Center District is undertaken by the Commonwealth.

6.3. Exterior and Interior Observations

6.3.1. General Observations

The Property has an approximate area of 74 cuerdas and belongs to the Commonwealth of Puerto Rico. Access to the Property is provided by a network of paved roads built as part of the military operation. Most of the Property has been developed, but a few undeveloped areas remain particularly towards the

⁴ 1 cuerda $\approx$ 0.97 acre.

coast and the former Miraflores Island, the only topographic elevation in the Property. The site has been zoned for public purposes.

For the purpose of this investigation the Property was divided into 31 discrete lots to ease the process of identifying recognized environmental conditions in connection with the Property. The following sections summarize the observations performed on each one of these lots. Please refer to Appendix C for detailed photographic documentation on each.

6.3.1.1. Hangar 12

Property ID: 1

Current Use: Abandoned

Past Use: Former aviation hangar (c. 1950s), Department of Public Works Maintenance Shop and PR Electric Power Authority laboratory.

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Petroleum products were identified in connection with identified uses of the site. The site used to operate a mechanical and maintenance area where all the military vehicles were repaired and preventive maintenance done.
Storage Tanks	No evidence of Above Storage Tanks (AST) or Underground Storage Tanks (UST) was observed during the site reconnaissance.
Odors	No strong, pungent, or noxious odors were detected.
Pools of Liquid	Two pits were identified at the southeast corner of the structure filled with an unknown liquid, possibly water.
Drums	No drums were observed at the premises.

Hazardous Substances and Petroleum Products Containers	Approximately 45 containers (plastic and metal) with a capacity ranging from 5 to 10 gallons were observed at two locations within the structure. Most were labeled as paints products, cleansers, adhesives, petroleum products, etc. All were in bad conditions and stored at two racks at the southwest corner of the main structure.
Unidentified Substance Containers	Approximately 25 of the containers described above were not identified.
PCB's	No evidence of PCB's was detected during our site visit to the site.
Interior Observations	• Heating/Cooling - A piping array was identified at the roof of the building in the first floor. • Stains or Corrosion - Stains of what appear to be oil products were observed in several areas both inside and outside of the main structure, and may be related to past uses of the structure. • Drain and Sumps - A sump containing an unknown liquid was observed at the southeast corner of the structure. Surface standing water was not observed during the site visit.
Exterior Observations	• Stained Soil or Pavement - Oil stains were observed between the electrical sub-station and one of the annex structures at the back of the main building (former PREPA laboratories). • Stressed Vegetation - Stressed vegetation was observed at the east side of the building. • Solid Waste - Substantial accumulation of construction waste, earth crust materials and debris were found north of the building. • Waste Water - No waste water was observed during the site visit. • Wells - A sampling well was observed at the west side of the building.

Other Hazardous Materials	- Lead Based Paint (LBP) was detected extensively in painted surfaces, pipes, ceramic tiles, bathroom components, and steel handles. - Asbestos Containing Materials (ACM) may be present on vinyl floor tiles, ceiling tiles, roof material, Thermal System Insulation (TSI) on pipelines, and HVAC joint belts.
Limitations to Access the Property	- Could not access an annex structure adjacent to an electrical sub-station in the rear site of the main building. - Accumulation of debris prevented assessing soil conditions north and east of the Property

6.3.1.2. Viva Carpets & Home Company Warehouse

Property ID:	2
Current Use:	Furniture Warehouse
Past Use:	Former Public Works storage building (c. 1950's)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	No hazardous substances or petroleum were identified in connection with identified past uses.
Storage Tanks	One concrete reservoir structure was identified north of the building. This tank was closed and sealed at the time of the visit though it appears it was used to storage water. No ASTs were observed.
Odors	No strong, pungent, or noxious odors were detected.

Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	Approximately 43 containers (plastic and metal) of different sizes, including 55-gallon drums, were observed in a storage room within the site.
Hazardous Substances and Petroleum Products Containers	Three 40-gallon Methyl 3-Aminocrotonate containers were identified at the chemical storage area located to the north of the structure. Two of the containers were observed in good condition. A third was leaking its contents over the floor.
Unidentified Substance Containers	Approximately 20 of the containers described above were not identified.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling - A piping array, most likely to convey water, was identified at the roof of the building. • Stains or Corrosion - None observed. • Drain and Sumps - A structure of what appears to be a drainage channel system traverses the building. This system is not in operation and most of the segments comprising it are covered with concrete slabs. Surface standing water was not observed.
Exterior Observations	• Stained Soil or Pavement - No stained soil or pavement was observed. • Stressed Vegetation - Stressed vegetation was not observed. • Solid Waste - Substantial accumulation of construction waste, earth crust materials and debris were found south of the building. • Waste Water - No waste water was observed at the site. • Wells - No wells were observed at the site.

Other Hazardous Materials	• LBP was detected in painted surfaces and piping. • ACM may be present on vinyl floor tiles, ceiling tiles, roof material.
Limitations to Access the Property	• Visual inspection of the purported drainage system traversing the floor of the structure could not be accomplished due to structural constraints. • The content of the UST was not assessed because the concrete structure was sealed.

6.3.1.3. Metal Building Contractors Inc.

Property ID: 3

Current Use: Construction Firm

Past Use: Former Public Works storage building (c. 1950's)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	No hazardous substances or petroleum were identified in connection with identified past uses.
Storage Tanks	One AST use to store propane gas was observed at the site. No USTs were identified.
Odors	No strong, pungent, or noxious odors were detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	No drums were observed at this location.

Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling – A piping array, most likely to convey water, was identified at the roof of the building. • Stains or Corrosion – None observed. • Drain and Sumps – A structure of what appears to be a drainage channel system traverses the building. This system is not in operation and most of the segments comprising it are covered with concrete slabs. Surface standing water was not observed.
Exterior Observations	• Stained Soil or Pavement - Stained soil was observed to the south. • Stressed Vegetation – Stressed vegetation was not observed. • Solid Waste - Substantial accumulation of construction waste, earth crust materials and debris were found south of the building. • Waste Water – No waste water was observed at the site. • Wells – No wells were observed at the site.
Other Hazardous Materials	• LBP was detected in painted surfaces and piping. • ACM may be present on vinyl floor tiles, ceiling tiles, roof material.
Limitations to Access the Property	None

6.3.1.4. La Casa del Techero Inc.

Property ID: 3

Current Use: Commercial Warehouse for Roof Sealing Products

Past Use: Naval Exchange Storehouse (c. 1950's)

Hazardous Substances and Petroleum Product in Connection with Identified Uses

The building is used to store roof sealing materials, mostly comprised of petroleum products.

Storage Tanks

No evidence on the presence of ASTs or USTs was observed.

Odors

No strong, pungent, or noxious odors were detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

Approximately 28 unidentified 55-gallon metal drums were observed south of the building.

Hazardous Substances and Petroleum Products Containers

Around 200 plastic 5-gallon containers and approximately 100 roof sealing material stacked in rolls were identified inside the main building. These materials are sold by the company to construction contractors and all were observed to be in good condition.

Unidentified Substance Containers

Approximately 28 unidentified 55-gallon metal drums were observed south of the building.

PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Stains or Corrosion – None observed. • Drain and Sumps – None observed.
Exterior Observations	• Stained Soil or Pavement - None observed. • Stressed Vegetation – None observed. • Solid Waste - None observed. • Waste Water – No waste water was observed at the site. • Wells – No wells were observed at the site.
Other Hazardous Materials	• LBP was detected in painted surfaces and piping. • ACM may be present on vinyl floor tiles and roof material.
Limitations to Access the Property	None

6.3.1.5. Former PR General Services Administration Gas Station

Property ID: 5

Current Use: Abandoned

Past Use: Former Naval Fire Station and Garage (c. 1950's), Administración de Servicios Generales

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Hazardous substances and petroleum were identified in connection with the identified uses of the site.
Storage Tanks	No evidence of AST's was observed. Two suspect USTs were identified at the site visit.
Odors	No strong, pungent, or noxious odors were detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	Two unidentified 55-gallon metal drums filled with an unidentified liquid were observed by the former gas station area of the site. These drums were observed to be in poor and deteriorated conditions.
Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	Two unidentified 55-gallon metal drums filled with an unidentified liquid were observed by the former gas station area of the site. These drums were observed to be in poor and deteriorated conditions.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling - Pipes were identified at the roof of the main building, most likely belonging to an old fire sprinkler system. • Stains or Corrosion - Oil stains were observed on the building floor in several areas, particularly at the auto shop portion of the building. • Drain and Sumps - None observed

Exterior Observations	• Stained Soil or Pavement – Extensive oil stains at the former auto shop location were observed. • Stressed Vegetation – None observed • Solid Waste – A substantial amount of earth crust materials and debris was observed at the southern portion of the site. • Wells – None observed.
Other Hazardous Materials	• LBP was detected in painted surfaces and piping. • ACM may be present on vinyl floor tiles and roof material.
Limitations to Access the Property	Most of the southern portion of the site was covered with large amounts of earth-crust materials and construction debris that prevented an adequate assessment of the soil conditions at this location.

6.3.1.6. Precision Marine

Property ID: 6

Current Use: Machine Shop

Past Use: Former Naval Paint and Oil Store House

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Several containers of different size containing unidentified oil products were identified at the site.
Storage Tanks	No evidence of AST's or UST's was observed.

Odors	No strong, pungent, or noxious odors were detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	Three unidentified 55-gallon metal drums filled with an unidentified liquid were observed outside the main structure. These drums were observed to be in poor and deteriorated conditions.
Hazardous Substances and Petroleum Products Containers	Several petroleum product containers were observed at the site. As an ongoing operation, most of the containers identified inside the machine shop were in good condition. However, various containers stored outside, including the 3 drums described above, showed signs of deterioration and no measures were observed so as to avoid impacts to the soil should there be a release.
Unidentified Substance Containers	Approximately 17 unidentified containers with capacities ranging from 1 to 55 gallons were observed stored in the open. Contents appeared to be oil products in all instances.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling – None observed. • Stains or Corrosion – Small oil stains were observed near machinery in some instances. • Drain and Sumps – None observed
Exterior Observations	• Stained Soil or Pavement – Oil stains were observed near unidentified containers sitting outside the main structure. • Stressed Vegetation – Stressed vegetation was observed near the locations where unidentified-substance containers were documented. • Solid Waste – No accumulation of solid waste was observed at the site. • Wells – None observed.

Other Hazardous
Materials

- LBP was detected in painted metal surfaces, structural beams and piping.
- ACM may be present on vinyl floor tiles.

Limitations to Access the Property None.

6.3.1.7. Puerto Rico Ports Authority "SIAAME"

Property ID: 7

Current Use: PR Ports
Authority Offices

Past Use: Former Naval
Paint and Oil
Store House

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

Entry to this parcel was not authorized by the occupant, the PRPA. A limited site inspection was performed by walking around the site.

Storage Tanks

One AST of unknown capacity was observed northwest of the parcel. According to the Environmental Quality Board, the Puerto Rico Port Authority currently operates an UST (ID# 2-920085) though it was not possible to identify it during the site visit.

Odors

No strong, pungent, or noxious odors were detected.

Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	The presence or absence of drums or any other containers was not possible due to lack of access to the parcel.
Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	See previous paragraph.
PCB's	See above
Interior Observations	See above
Exterior Observations	See above
Other Hazardous Materials	None
Limitations to Access the Property	Access to this parcel was denied by the PRPA, the current occupant of said parcel.

6.3.1.8. Former Commissary and Navy Exchange

Property ID: 8

Current Use: Abandoned

Past Use: Commissary and Store

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

No hazardous substances or petroleum products were identified in connection with identified uses of the parcel.

Storage Tanks

No evidence of AST's or UST's was observed.

Odors

Strong oil odor was detected northeast of the parcel at an area where large amounts of debris, scrap metal and earth crust materials were accumulated, presumably by the PRPA.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

Approximately 24 containers, 23 55-gallon metal drums and one 220-gallon plastic container were identified at the site, with various amounts of unidentified liquids. Though mostly unlabeled, some of the drums had the Mobil brand label. Inside the main structure, one 55-gallon metal drum with an unidentified content was observed. The remaining 23 drums were located to the north of the main structure.

Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	See previous paragraph.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling – None observed. • Stains or Corrosion – None observed • Drain and Sumps – The main structure basement was flooded at the time of the visit. • Debris – Large amounts of refuse and debris were observed inside the main structure.
Exterior Observations	• Stained Soil or Pavement – Areas of stained soil were observed outside of the main structure near the area where the unidentified drums were documented. • Stressed Vegetation – Stressed vegetation was observed near areas of stained soil and those locations where large amounts of scrap metal and abandoned vehicles were observed. • Solid Waste - Substantial amounts of waste, scrap metal and debris were observed north of the main structure. • Wells – None observed
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping. • ACM may be present on vinyl floor tiles, decorative ceiling tiles, TSI on pipelines, HVAC Joint belts, and a boiler tank located to the back of the main structure.

Limitations to Access the Property Access to the main structure basement was not possible due to flooding caused by a broken water main.

6.3.1.9. Caribe Techno Corporation

Property ID: 9

Current Use: Construction contractor warehouse

Past Use: Department of Transportation parking lot

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Petroleum products were identified in connection with identified uses of the parcel. See the following paragraphs for details.
Storage Tanks	No evidence of AST's or UST's was observed.
Odors	No strong, pungent or noxious odors were detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	Approximately 15 55-gallon metal drums were identified at the site, with various amounts of unidentified liquids. The site escort indicated that the contents of these were mostly curing agents used for concrete. This information could not be verified as most of the labels were unintelligible. Most of the drums appeared to be in deteriorated conditions.

Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	See previous paragraph.
PCB's	No evidence of PCB's was detected during the site visit.
Interior Observations	• Heating/Cooling – None observed. • Stains or Corrosion – None observed • Drain and Sumps – None observed • Debris – None observed.
Exterior Observations	• Stained Soil or Pavement – None observed • Stressed Vegetation – Stressed vegetation was observed near some areas where large amounts of construction debris and abandoned vehicles were observed. • Solid Waste - Substantial amounts of waste, scrap metal and debris were observed south of the main structure. • Wells – None observed
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	None

6.3.1.10. Trans Caribbean Marine

Property ID: 10

Current Use: Stevedoring company warehouse and repair shop

Past Use: Department of Transportation parking lot

Hazardous Substances and Petroleum Product in Connection with Identified Uses

Petroleum products were identified in connection with the present use of the site. Currently, the site is used as a repair shop for heavy equipment. During the site visit, several containers used to store used oil, motor oil, lubricant oil, grease, and solvents, were identified at the site. In other instances, an assortment of other containers of various capacities was documented. All of said containers lacked identification with regards to their contents.

Storage Tanks

Four ASTs were identified at the site. Two of the ASTs were used to store hydraulic oil and had a capacity of 300 and 400 gallons. One 2,500-gallon AST was used to store diesel fuel. The remaining AST was used to store used oil generated at the facility and had a capacity of 400 gallons. All ASTs were more than 5 years old.

Odors

A strong petroleum-product odor was detected at the site.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums	Approximately 28 55-gallon metal drums were identified at the site, with various amounts of unidentified liquids. Most of the drums appeared to be in deteriorated conditions.
Hazardous Substances and Petroleum Products Containers	Three (3) container storage areas were identified at the site. Two of these were used to store used oil and one was used to wash parts using solvents. A large amount of containers (plastic and metal) was observed at the site. All the containers had some unidentified content and were distributed randomly around the facility and pointed to an accumulation of oil waste.
Unidentified Substance Containers	Almost all the containers observed were not properly labeled and identified.
PCB's	One empty electric transformer enclosure was found south of the main structure full of what appeared to be dielectric oil.
Interior Observations	• Heating/Cooling – None observed. • Stains or Corrosion – Several oil stains associated to oil spills or releases within the mechanical repair area were observed. • Drain and Sumps – Stormwater drainage structures at the site appeared to be impacted with sediments and stained soil.
Exterior Observations	• Stained Soil or Pavement – Most of the entire property soil shows impacts due to petroleum products releases. • Stressed Vegetation – No vegetation was observed at the site. • Solid Waste – Most of the area is occupied by heavy equipment in various degrees of disrepair. Some of this heavy equipment can be considered solid waste, due to their deteriorated nature. • Wells – No wells were observed at the site.

Other Hazardous Materials • None observed

Limitations to Access the Property None

6.3.1.11. Former Pan American Olympic Gymnasium

Property ID: 11A

Current Use: Stevedoring Company Warehouse and repair shop

Past Use: Department of Transportation Parking Lot

Hazardous Substances and Petroleum Product in Connection with Identified Uses None observed.

Storage Tanks None observed.

Odors None detected.

Pools of Liquid No pools of liquid or sumps were observed during the site visit.

Drums None observed.

Hazardous Substances and Petroleum Products Containers None observed.

Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Heating/Cooling – None observed. • Stains or Corrosion – None observed. • Drain and Sumps – None observed. • Solid Waste – Some accumulation of wood pallets and domestic refuse was observed inside the former gymnasium building.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed. • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP – may be present in metal painted surfaces, piping, and steel beams.
Limitations to Access the Property	Interior observations were made through open windows that allowed view to most of the inside areas of the structure.

6.3.1.12. Parking Lot

Property ID: 11B

Current Use: Empty lot

Past Use: Softball Field

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

One 55-gallon drum of unknown content was observed inside a cargo container at the site (see below).

Hazardous
Substances and
Petroleum Products
Containers

A 20-foot cargo container was documented at the northeast corner of the site. The container is used for the storage of paint-related products and solvents. More than two-dozen containers were documented at this location. There was no indication as to where and for what purposes these products were used. Most of the containers appear to be corroded and in deteriorated conditions.

Unidentified
Substance Containers

Please refer to previous paragraph.

PCB's	None observed.
Interior Observations	N/A
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed, aside from the accumulation of paint-related products observed inside the cargo container described above. • Wells - No wells were observed at the site.
Other Hazardous Materials	None.
Limitations to Access the Property	None.

6.3.1.13. Abandoned Structure

Property ID: 12

Current Use: Abandoned

Past Use: Unknown.
Historical photos show an empty lot during the height of the military facility operation (c. 1950s).

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
Storage Tanks	None observed.
Odors	None detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed inside the main structure • Wells - No wells were observed at the site. • Abandoned infrastructure - An abandoned electrical sub-station was found north of the structure.

Other Hazardous
Materials

- LBP was detected in painted metal surfaces, piping and steel beams at the site.
- ACM may be present on vinyl floor tiles, and ceiling panels.

Limitations to Access the Property None.

6.3.1.14. Former Marines Barracks

Property ID: 13

Current Use: Abandoned

Past Use: Military living quarters (c. 1950s).

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

None observed.

Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site. • Abandoned infrastructure - An abandoned electrical sub-station was found north of the structure.
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	Access to the basement was not possible.

6.3.1.15. Former Marines Barracks

Property ID: 14

Current Use: Abandoned

Past Use: Military living quarters (c. 1950s).

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

One 55-gallon closed-head metal drum was found in the first floor of the two-story structure. The drum was full with an unknown liquid.

Hazardous
Substances and
Petroleum Products
Containers

See previous paragraph.

Unidentified
Substance Containers

See previous paragraph.

PCB's

None observed.

Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	Access to the basement was not possible.

6.3.1.16. Former Marines Barracks

Property ID: 15

Current Use: Abandoned

Past Use: Military living quarters (c. 1950s).

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
Storage Tanks	None observed.
Odors	None detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site.

Other Hazardous
Materials

- LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site.
- ACM may be present on vinyl floor tiles, and ceiling panels.

Limitations to Access
the Property

Access to the basement was not possible.

6.3.1.17. Former Marines Barracks

Property ID: 16

Current Use: Abandoned

Past Use: Military living quarters (c. 1950s).

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

None observed.

Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	Four 1-gallon cans of paint-related products were documented inside the first floor of this two-story structure. Label information was unintelligible.
PCB's	None observed.
Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	Access to the basement was not possible.

**6.3.1.18. Former Banco Popular & Harbor Bunkering Corp. and Aqua
Clean Ships Caribe, Inc.**

Property ID: 17

Current Use: Abandoned

Past Use: Commercial
establishments
(c. 1980s)

Military living
quarters (c.
1950s).

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during
the site visit.

Drums

None observed.

Hazardous
Substances and
Petroleum Products
Containers

None observed.

Unidentified
Substance Containers

None observed.

PCB's

None observed.

Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	Access to the basement was not possible.

6.3.1.19. Former Bomberos de Puerto Rico

Property ID:	18
Current Use:	Abandoned
Past Use:	PR Fire Department Offices (c. 1980s) Military living quarters (c. 1950s).

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
Storage Tanks	None observed.
Odors	None detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	One 55-gallon closed-head metal drum was found in the first floor of the two-story structure. The drum was full with an unknown liquid.
Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	See previous paragraph.
PCB's	None observed.
Interior Observations	• Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drains and Sumps – No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – Accumulation of domestic waste was observed around the main structure • Wells - No wells were observed at the site.

Other Hazardous Materials	• LBP was detected in painted metal surfaces, ceramic tiles, bathroom components and piping at the site. • ACM may be present on vinyl floor tiles, and ceiling panels.
Limitations to Access the Property	Access to the basement was not possible.

6.3.1.20. Concreteras de Puerto Rico

Property ID:	19A
Current Use:	Abandoned temporary concrete mixing facility
Past Use:	Tank Farm #1 (Site 36)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Several 55-gallon metal drums and one 220-gallon plastic container were found at the site. All containers were labeled with the exception of two unmarked pails that contained used oil. Contents included lubricants, hydraulic oil, used oil and curing agents, all compatible with the concrete mixing operation formerly taking place there.
Storage Tanks	Five ASTs were identified at the site. The larger two (approx 3,500 gal each) were used to store fuel. The remaining three AST's were used to feed the concrete mixing operation with chemicals identified as DCI S Corrosion Inhibitor, DARACEN 100 Superplasticizer and Superplastificent, and one Recovery Hydration Stabilizer. All the ASTs appeared to be in good condition.

Odors	Strong gasoline odor was detected at one of the AST's identified as combustible storage.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	Approximately four closed-head 55-gallon metal drums were identified at the site. Three of these were labeled as lubricant oil, and one as Certi-Vex FR-L-VOC (concrete curing agent).
Hazardous Substances and Petroleum Products Containers	See previous paragraph.
Unidentified Substance Containers	Two 5-gallons unmarked pails with what appeared to be used oil were identified at the site.
PCB's	None observed.
Interior Observations	• Only enclosed structure at the site consisted of a trailer. • Heating/Cooling - No pipes were identified at the building. • Stains or Corrosion - No stains were observed at the site. • Drains and Sumps - No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement - None observed. • Stressed Vegetation - Some observed around the concrete mixing equipment. • Solid Waste - Accumulation of domestic waste was observed all through the site. • Wells - No wells were observed at the site.
Other Hazardous Materials	None.

Limitations to Access None.
the Property

6.3.1.21. Del Valle Group Temporary Staging Lot

Property ID: 19B

Current Use: Abandoned. A portion is used by Del Valle Construction as staging area for an ongoing PRASA project

Past Use: Engineering Test building (c. 1950s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	Approximately 80 55-gallon metal and plastic drums were found at the western limit of the site. Most, if not all, containers were not labeled and contained what appeared to be petroleum products. Containers are stored in the open without any secondary containment measures in place to deter an accidental spill or release.
Storage Tanks	One 500-gallon double walled ASTs was identified at the site near a cargo container. Said AST appears to be used to store fuel for the construction machinery employed by the Del Valle Group. The AST appeared to be in good condition.
Odors	Strong gasoline odor was detected at one of the AST's identified as combustible storage.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.

Drums	Approximately 80 55-gallon metal and plastic drums were found at western limit of the site. Most, if not all, containers were not labeled and contained what appeared to be petroleum products. Containers are stored in the open without any secondary containment measures in place to deter an accidental spill or release.
Hazardous Substances and Petroleum Products Containers	Please refer to previous paragraph.
Unidentified Substance Containers	Please refer to previous paragraph.
PCB's	None observed.
Interior Observations	• Only structure standing at the site is severely damaged and its interior is completely exposed to the elements. • Stains or Corrosion - No stains were observed at the site. • Drains and Sumps - No accumulation of liquids was observed at the site.
Exterior Observations	• Stained Soil or Pavement - None observed. • Stressed Vegetation - None observed. • Solid Waste - A significant amount of construction debris was found at the site. • Wells - No wells were observed at the site.
Other Hazardous Materials	None.
Limitations to Access the Property	Access to two cargo containers belonging to the Del Valle Group operation and presumably used as storage was not possible.

6.3.1.22. Empty Lot Near PRPA Piers 15-16

Property ID: 19C

Current Use: Port facility managed by the PRPA

Past Use: Tank Farm #1 (Site 36)

Hazardous Substances and Petroleum Product in Connection with Identified Uses

One 55-gallon metal drum was found at the eastern limit of the site. Container was not labeled and the contents could not be identified.

Storage Tanks

None observed

Odors

None detected

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

One 55-gallon metal drum was found at the eastern limit of the site. Container was not labeled and the contents could not be identified.

Hazardous Substances and Petroleum Products Containers

Please refer to previous paragraph.

Unidentified Substance Containers

Please refer to previous paragraph.

PCB's

None observed.

Interior Observations

N/A

Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site.
-----------------------	---

Other Hazardous Materials	None.
---------------------------	-------

Limitations to Access the Property	None.
------------------------------------	-------

6.3.1.23. Container Yard I

Property ID: 20

Current Use: Container yard managed by the PRPA

Past Use: Tank Farm #2 (Site 39)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed
---	---------------

Storage Tanks	None observed
---------------	---------------

Odors	None detected
-------	---------------

Pools of Liquid	No pools of liquid or sumps were observed during the site visit.

Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	N/A
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	None.
Limitations to Access the Property	None.

6.3.1.24. Container Yard II

Property ID: 21

Current Use: Container yard managed by the PRPA

Past Use: Storehouse 57 (c. 1950s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed
Storage Tanks	None observed
Odors	None detected
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	N/A
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site. • Septic Systems – None identified at the site visit. Historical map indicates that two septic systems existed at the site.
Other Hazardous Materials	None.
Limitations to Access the Property	None.

6.3.1.25. Miramar Equestrian School

Property ID: 22

Current Use: Stables and equestrian training center.

Past Use: Surplus Material and Equipment Warehouse, Dump (c. 1950s) and Firing Range (c. 1990s).

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

None observed

Storage Tanks

None observed

Odors

None detected

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

None observed.

Hazardous
Substances and
Petroleum Products
Containers

None observed.

Unidentified
Substance Containers

None observed.

PCB's

None observed.

Interior Observations

- Property consists of a single-family residence and stables plus open training areas.
- Heating/Cooling – No pipes were identified at the building.
- Stains or Corrosion – No stains were observed at the site.
- Drain and Sumps – None observed.

Exterior Observations

- Stained Soil or Pavement – None observed.
- Stressed Vegetation – None observed.
- Solid Waste – None observed
- Wells - No wells were observed at the site.
- Historical maps indicate the existence of a “Dump” at this location. Topography suggests the possibility of a large accumulation of materials near the coastal fringe.

Other Hazardous Materials

None.

Limitations to Access the Property

None.

6.3.1.26. Former Departamento de la Familia Child Care Facility

Property ID: 23

Current Use: Abandoned

Past Use: Transformer vault (c. 1950s).

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed
Storage Tanks	None observed
Odors	None detected
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Property consists of a single U-Shaped structure made of metal sheeting and structural steel. • Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drain and Sumps – None observed.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• ACM be present in vinyl floor tiles and ceiling tiles.

Limitations to Access the Property	Access to a transformer vault located east of the site was not possible.
------------------------------------	--

6.3.1.27. Polvorin de Miraflores

Property ID:	24
Current Use:	Abandoned
Past Use:	Chapel (c. 1950s), munitions storage (c. 1776- early 1900s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
---	----------------

Storage Tanks	None observed.
---------------	----------------

Odors	None detected.
-------	----------------

Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
-----------------	--

Drums	None observed.

Hazardous Substances and Petroleum Products Containers	None observed.
--	----------------

Unidentified Substance Containers	None observed.
-----------------------------------	----------------

PCB's	None observed.
Interior Observations	• Site consists of a one-story concrete structure of historical relevance which has been in use since the Spanish Conquest historical period. Access to the inside of the building was not possible.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP may be present in painted surfaces
Limitations to Access the Property	Access to the inside of the building was not possible.

6.3.1.28. Former GPO Recreation Building

Property ID: 25A

Current Use: Abandoned

Past Use: GPO Recreation Building (c. 1950s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
---	----------------

Storage Tanks	None observed.
Odors	None detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Site consists of a one-story concrete structure • Heating/Cooling - No pipes were identified at the building. • Stains or Corrosion - No stains were observed at the site. • Drain and Sumps - None observed.
Exterior Observations	• Stained Soil or Pavement - None observed. • Stressed Vegetation - None observed. • Solid Waste - None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP may be present in painted surfaces • ACM may be present on vinyl floor tiles, corrugated panels, and decorative ceiling tiles.
Limitations to Access the Property	None.

6.3.1.29. Former Quarters

Property ID: 25B

Current Use: Abandoned

Past Use: Officer quarters (c. 1950s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses

None observed.

Storage Tanks

None observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums

Unidentified Substance Containers

None observed.

PCB's

None observed.

Interior Observations	• Site consists of a one-story concrete structure • Heating/Cooling - No pipes were identified at the building. • Stains or Corrosion - No stains were observed at the site. • Drain and Sumps - None observed.
Exterior Observations	• Stained Soil or Pavement - None observed. • Stressed Vegetation - None observed. • Solid Waste - None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP may be present in painted surfaces and ceramic tiles. • ACM may be present on vinyl floor tiles and decorative ceiling tiles.
Limitations to Access the Property	None.

6.3.1.30. Former Quarters and GPO Storehouse

Property ID: 25C

Current Use: Abandoned

Past Use: Officer quarters and warehouse (c. 1950s)

Hazardous Substances and Petroleum Product in Connection with Identified Uses	None observed.
Storage Tanks	None observed.
Odors	None detected.
Pools of Liquid	No pools of liquid or sumps were observed during the site visit.
Drums	None observed.
Hazardous Substances and Petroleum Products Containers	None observed.
Unidentified Substance Containers	None observed.
PCB's	None observed.
Interior Observations	• Site consists of a one-story concrete structure • Heating/Cooling – No pipes were identified at the building. • Stains or Corrosion – No stains were observed at the site. • Drain and Sumps – None observed.
Exterior Observations	• Stained Soil or Pavement – None observed. • Stressed Vegetation – None observed. • Solid Waste – None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP may be present in painted surfaces and bathroom components. • ACM may be present on vinyl floor tiles and roof panels.

Limitations to Access None.
the Property

6.3.1.31. Academia de Bomberos de Puerto Rico

Property ID: 26

Current Use: PR Fire
Department
Training Center

Past Use: Salvage yard &
dump (c. 1950s)

Hazardous
Substances and
Petroleum Product in
Connection with
Identified Uses

Hazardous substances and petroleum products were identified in connection with current uses of the site. One 55-gallon metal drum with a Hazardous Waste label "Waste Fuel" generated by the Army Aviation Support Facility was observed in the vehicle maintenance area. Also, 18 55-gallon unlabeled metal drums allegedly containing used oil mixed with aviation fuel JP-5 were observed near the training areas without any spill countermeasures in place.

Storage Tanks

One 500-gallon AST was identified to the back of the vehicle maintenances area. The AST is used to store fuel to be used during training exercises. No USTs were observed.

Odors

None detected.

Pools of Liquid

No pools of liquid or sumps were observed during the site visit.

Drums	Approximately 18 55-gallon unlabeled metal drums allegedly containing used oil mixed with aviation fuel JP-5 were observed near the training areas without any spill countermeasures in place. One 55-gallon metal drum with a Hazardous Waste label "Waste Fuel" generated by the Army Aviation Support Facility was observed in the vehicle maintenance area.
Hazardous Substances and Petroleum Products Containers	Please refer to the previous paragraph. In addition, 36 275-gallon plastic containers were observed southwest of the site over a concrete slab. These containers were identified as National Foam Universal Plus and Thunder Storm. These products are foaming agents used to extinguish large fires. These products are not classified as hazardous.
Unidentified Substance Containers	Approximately 18 55-gallon unlabeled metal drums allegedly containing used oil mixed with aviation fuel JP-5 were observed near the training areas without any spill countermeasures in place.
PCB's	None observed.
Interior Observations	• Site consists of two one-story concrete structures, one vehicle maintenance area, a concrete slab used to store training materials, one mock residence used for training purposes, various vehicles used as training tools, open training areas and one rappel tower. • Heating/Cooling - No pipes were identified at the building. • Stains or Corrosion - No stains were observed at the site. • Drain and Sumps - None observed.

Exterior Observations	• Stained Soil or Pavement -Oil stains were observed at different locations within the site. Some of the stains were documented at the fire training area and at the boundary with the Crowley container yard facility. • Stressed Vegetation - Stressed vegetation was observed at the boundary with the Crowley container yard facility. • Solid Waste - None observed • Wells - No wells were observed at the site.
Other Hazardous Materials	• LBP may be present in painted surfaces and bathroom components. • ACM may be present on vinyl floor tiles and roof panels.
Limitations to Access the Property	None.

7.0. INTERVIEWS

7.1. Interview with Local Government Officials: PRPA

AGE interviewed Mrs. Milagros Rodriguez, Environmental Affairs Manager for the PR Ports Authority with the intent of finding out if there had been historical environmentally significant events in the vicinity of the Property that could have resulted in environmental impacts to the Property or adjoining properties. Mrs. Rodriguez provided the following statements:

- She knew about various incidents relevant to hazardous substances or petroleum products in, on, or from the Property.
- She had worked closely with US ARMY Corps of Engineers on various remediation efforts at the Property and its vicinity, so far PRPA pier facilities and container yards are located within some of those sites.
- She said that the PRPA has also been working closely with the EQB on improving the environmental conditions of the Property, including various locations that have been impacted by petroleum-product releases. Among these, the General Services Administration former gas station stands-out as one of the most affected sites.
- She also said that the PRPA had undertaken various ACM and LBP abatement projects at the Property and that such materials are widespread throughout most of the structures built by the military at the Property.

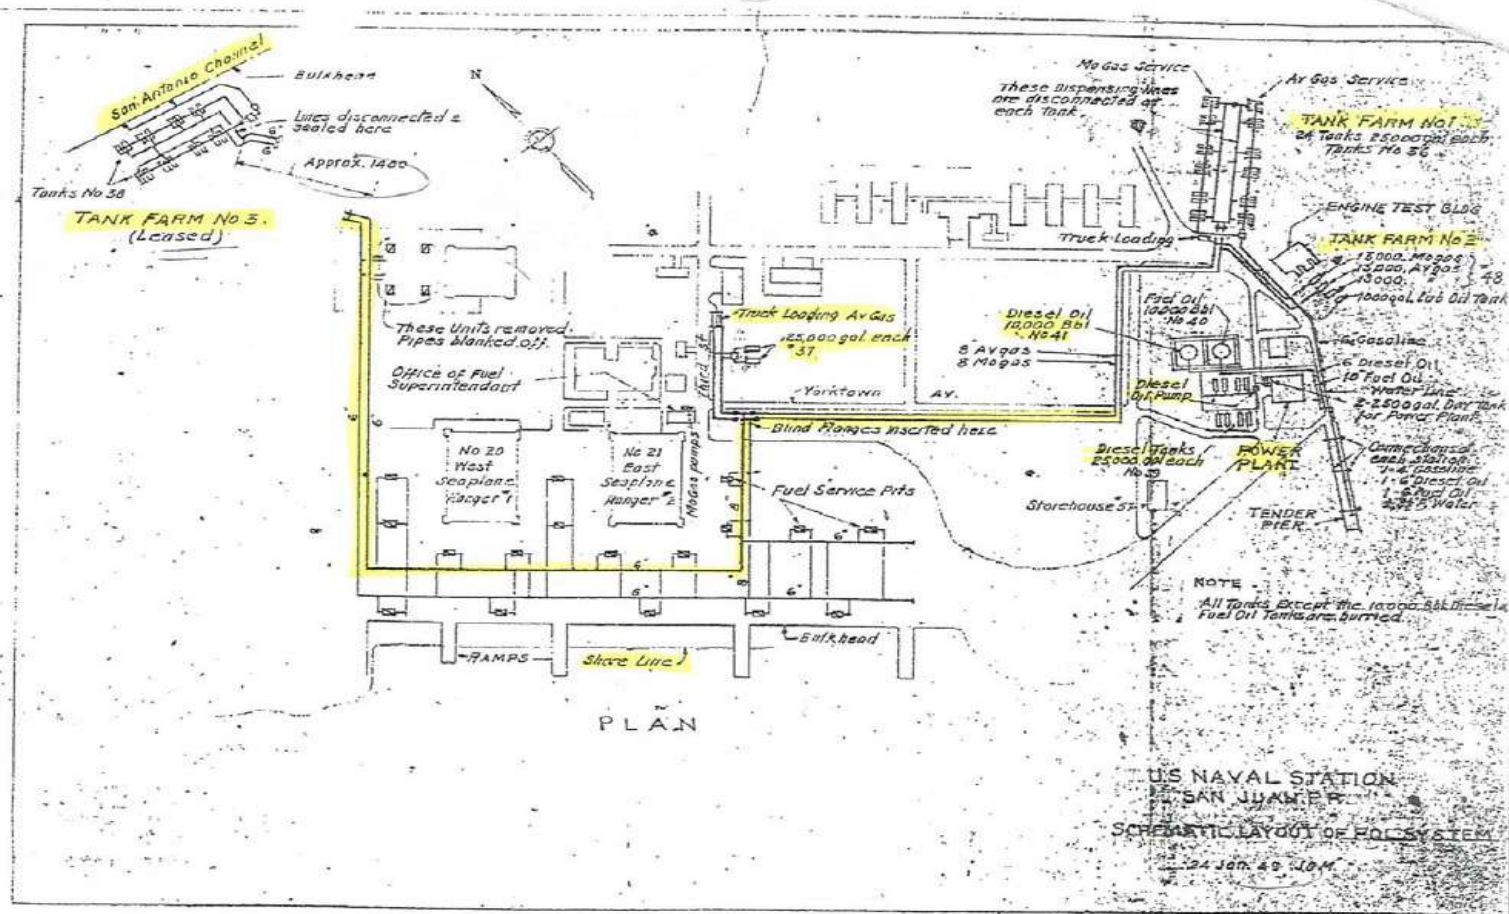

7.2. Interview with Local Government Officials: US ARMY Corps of Engineers

AGE interviewed Eng. José Mendez, Project Manager at the USACE Planning Division, with the intent of finding out if there had been historical environmentally significant events in the vicinity of the Property that could have resulted in environmental impacts to the Property or adjoining properties. Eng. Rodriguez provided the following statements:

- He has been working as project manager for the USACE in various remediation projects at the Property.
- These projects have been undertaken a Total Environmental Restoration Contracts (TERC) under the Defense Environmental Restoration Program for Formerly Used Defense Sites (DERP-FUDS).
- Various impacted areas inside the Property have been characterized and remediated as part of a TERC. Among these areas, he mentioned the former Tank Farm 1 (Site 36), Tank Farm 2, Site 39, and most recently, an investigation at the former firing range that detected soil impacted with heavy metals that was later removed.

- With regards to Site 36, he mentioned that, although a complete characterization has been completed in 2002, EQB has not yet endorsed the closure scheme proposed for the site.
- Eng. Mendez also mentioned that two 25,000-gallon USTs that were installed by the military in the 1950's were still buried at the PR General Services Administration gas station. He said that the removal of those USTs was not eligible for a TERC project and that, to the best of his knowledge, the USTs had not been removed yet.
- Eng. Mendez also provided AGE with a historic (c. 1950) schematic layout of the US Naval Station San Juan Fuel System that shows a fuel pipeline connecting various UST locations at the Property, specifically, the PR General Services Administration gas station, Site 36, Site 39 and Tank Farm 2. He asserted that to the best of his knowledge, the pipeline had not been removed (please refer to Figure 7-1 for details).

FIGURE 7-1. HISTORICAL SCHEMATIC FUEL SYSTEM LAYOUT

7.3. Interview with Occupant: Viva Carpets

AGE interviewed Mr. Julio Ramirez, who serves as deputy manager for the Viva Carpets warehouse. Mr. Ramirez provided the following statements:

- He has been working at the site for the past 4 years.
- He did not know of any incidents relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

7.4. Interview with Occupant: Casa del Techero

AGE interviewed Mrs. Rita Hernandez, who serves as manager for the Casa del Techero store. Mrs. Hernandez provided the following statements:

- She has been working at the site for the past 3 years.
- She did not know of any incidents relevant to hazardous substances or petroleum products in, on, or from the site.
- She did not know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.
- She did not know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
- She pointed out that a significant accumulation of scrap, debris and used tires has been taking place over time at the former General Services Administration Gas Station. This has caused an increase in mosquitoes and vectors around the building where her operation takes place. She did not know the origin of these materials but she asserted she had notified the PRPA, the Property lessor, several times on this issue without any corrective actions taken.

7.5. Interview with Occupant: Trans Caribbean Marine

AGE interviewed Mr. Efrain Castro, manager for the Trans Caribbean Marine storage yard and repair shop. Mr. Castro provided the following statements:

- He has been working at the site for the past 10 years.
- He did not know of any incidents relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
- He said that the site his operation currently occupies was a former repair shop for government vehicles.

7.6. Interview with Occupant: Caribe Tecno

AGE interviewed Mr. José Carrasquillo, manager for the Caribe Tecno warehouse. Mr. Carrasquillo provided the following statements:

- He has been working at the site for the past 5 years.
- He did not know of any incidents relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the site.
- He did not know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.
- He asserted that the PRPA has disposed of several vehicles and other scrap materials at a parcel of land just south of the lot he occupies.

8.0. FINDINGS

8.1. Records Review

The records review identified the following known, suspect, or historical environmental conditions (REC's) in connection with the Property or its vicinity:

1. One (1) CERCLIS site is listed by the databases within a ½-mile radius of the Property.

- Scorpio Recycling Co. (CERCLIS EPA ID. PRSFN0204247), located at Isla Grande Dock, Lindbergh St., San Juan, Puerto Rico. The following information is provided for this facility:

Site Description	This facility was engaged in processing and recycling large amounts of scrap metal, including crushed drum, tanks, and auto parts. The company is still in operations. The site is classified as a low-priority site.
CERCLIS	Action: Discovery
Assessment	Date Completed: 11/11/99
History	Priority Level: Not reported
	Action: Preliminary Assessment
	Date Completed: 2/28/00
	Priority Level: High
	Action: Site Inspection
	Date Completed: 10/30/00
	Priority Level: High

In October 30, 2000 the site was classified under high priorities for further assistance.

2. Three (3) CERCLA NFRAP sites were identified within ½ mile of the Property.
 - US Navy Naval Sea System / Perez & Co. PR (Site ID 0203314), located at Miramar, San Juan, Puerto Rico. On June 27, 1991, according to a site investigation, the USEPA recommended to archive the site and to not pursue any further action.
 - Army Air Support Facility (Site ID0204086), located at San Juan, Puerto Rico. On April 22, 1997, according to a site investigation, the USEPA recommended to archive the site and to not pursue any further action.
 - New Army Aviation Support (Site ID 0204194), located at Isla Grande in San Juan, Puerto Rico. On August 30, 1999 the EPA, after a Federal Facility Preliminary Assessment Review, recommended to archive the site and to not pursue any further action.

3. As of March 2008, the EQB LUST list identified three facilities within ½ mile of the Property.
 - San Juan Gas Company (EQB Facility Number 94-0162), located at San Juan, Puerto Rico. This facility had not been released yet.
 - Estación de Gasolina A.S.G. (EQB Facility Number 86-0076), located at Miramar, San Juan, Puerto Rico. This facility had not been released yet.
 - Esso S/S Co.-035 (EQB Facility Number 86-1134), located at Miramar, San Juan, Puerto Rico. This facility was released, or closed by EQB on June 6, 2002.
4. As of January 2008, the EQB UST list identifies one UST facility at the Property or adjoining property.
 - Autoridad de los Puertos de Puerto Rico (EQB Facility Number 2-920085), located in Isla Grande, San Juan, Puerto Rico. According with the EQB and databases consulted the UST is currently in use.
5. Historical Maps of 10th N.D. HDQTRS. Naval Station U.S. Coast Guard Air Detachment of 1950.
 - According to this map some of the parcels than comprise the Property were used as disposal sites during time military operations were held at the Property as follows:
 - o Property 26 - This site was used in the past as a Salvage Yard. Today, the PR Fire Department operates a training center at this location
 - o Property 25 - This site was used in the past as a Dump. This site corresponds to the Miramar Equestrian School.
6. US Naval Station San Juan, PR - Schematic Layout of Fuel System, January 24, 1949.
 - According with this schematic layout, twin 8-inch pipes were installed to convey aviation fuel and motor fuel to various storage facilities throughout the Property. It is believed that this pipe remains in place at the Property.
7. Site 36 UST Contamination Assessment Report Former Naval Air Station San Juan, Puerto Rico, IT Corporation, August 2000.
 - According to this report, impacts related to the operation of this former UST cluster include soil contamination, residual free product and groundwater migration. Although the remedial alternative under consideration for the site was risk-based corrective action, no further information as to the closure status of this facility is known.

8.2. Site Reconnaissance

The site reconnaissance identified the following known, suspect, or historical environmental conditions (REC's) in connection with the Property or its vicinity:

- 1) Several instances of stained soil or pools of liquid that suggest the presence or likely presence of any hazardous substances or petroleum products on a Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, ground water, or surface water of the Property were recorded at the following locations (please refer to section 6.3 for details):
 - a) Hangar 12
 - b) PR General Services Administration gas station
 - c) Precision Marine
 - d) Former Commissary and Navy Exchange
 - e) Trans Caribbean Marine
 - f) PR Fire Department Training Center
- 2) Unidentified and labeled containers ranging from 1-gallon to 225-gallon plastic and metal units were observed at the following locations within the Property. While container conditions varied among sites, none of the sites had secondary containment or protective measures in place against releases. Substances ranged from the unknown to dielectric oil, solvents, curing agents, and hydraulic oil among others. Please refer to section 6.3 for details on each incidence:
 - a) Viva Carpets
 - b) Casa del Techero
 - c) PR General Services Administration gas station
 - d) Precision Marine
 - e) Former Commissary and Navy Exchange
 - f) Caribe Tecno
 - g) Trans Caribbean Marine
 - h) Parking Lot
 - i) Former Marine Barracks
 - j) Former Bomberos de Puerto Rico
 - k) Concreteras de Puerto Rico

- l) Del Valle Group temporary staging lot
 - m) Empty lot near Piers 15 & 16
 - n) PR Fire Department Training Academy
- 3) Asbestos-containing materials and lead-based paint were widely utilized by the military for construction purposes. During the site reconnaissance, all but the these sites had suspect ACM and/or LBP present that warrant further characterization and study:
- a) Trans Caribbean Marine
 - b) Miramar Equestrian School

Access to the PR Ports Authority SIAAME office was denied. An inspection is required to determine the possible presence of ACM and LBP at this location.

- 4) The following sites had areas that were apparently filled or graded by non-natural causes (or filled by fill of unknown origin) suggesting trash construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal. In some instances, the accumulation of debris prevented an adequate assessment of the soil conditions at the site:
- a) Hangar 12
 - b) Viva Carpets
 - c) Metal Building Contractors
 - d) PR General Services Administration gas station
 - e) Former Commissary and Navy Exchange
 - f) Caribe Tecno
 - g) Miramar Equestrian School
- 5) A structure of what appears to be a drainage channel system traverses the Viva Carpets / Metal Building Contractors building. This system is not in operation and most of the segments comprising it are covered with concrete slabs, preventing a thorough assessment of its purpose and condition.

8.3. Interviews

The interview component of this assessment identified the following known, suspect, or historical environmental conditions (REC's) in connection with the Property or its vicinity:

- 1) Site 36 – Although thoroughly studied and characterized, closure status of this site is unknown.

- 2) A 60-year old underground conveyance system used to distribute aviation and motor fuel to various facilities inside the Property appears to be still in place although abandoned decades ago.
- 3) The former PR General Services Administration gas station has two 25,000-gallon USTs that were never closed pursuant to EQB regulations. These USTs are leaking, according to the EQB database.

9.0. OPINION

Known, suspect, or historical environmental conditions in connection with the Property or its vicinity that may result in impacts to groundwater were identified as part of this assessment. An evaluation and opinion whether they shall be considered recognized environmental conditions (REC's) in connection with the Property is provided in the following paragraphs.

9.1. Records Review

1. The Scorpio Recycling Co. located in the vicinity of the Property has been dismissed as a REC in connection with the Property so far the potential for soil and groundwater impacts to the Property has been deemed insignificant.
2. The three CERC-NFRAP listed sites have been dismissed as a REC in connection with the Property so far the USEPA will not pursue any further action with regards to each.
3. Out of the 4 LUSTs identified in the vicinity of the Property only the Estación de Gasolina A.S.G. (EQB Facility Number 86-0076), located at the General Services Administration former gas station can be considered a REC in connection with the Property. The remaining three have been dismissed because the potential for soil and groundwater impacts to the Property has been deemed insignificant due to their location.
4. The Autoridad de los Puertos de Puerto Rico (EQB Facility Number 2-920085) UST located in Isla Grande, San Juan, Puerto Rico is considered a REC in connection with current uses of the Property, or adjoining properties, that warrants further study.
5. Based on the Historical Maps of 10th N.D. HDQTRS. Naval Station U.S. Coast Guard Air Detachment of 1950, it can be concluded that two locations within the Property were used as disposal sites in the past. Hence, the Miramar Equestrian School and the PR Fire Department Training Center sites are considered RECs in connection with past uses of the Property or adjoining properties.
6. Based on the US Naval Station San Juan, PR – Schematic Layout of Fuel System, January 24, 1949 map, it can be established that the underground fuel conveyance system represents a potential source of contamination to the soil and groundwater at the Property. As such, this system is considered a REC in connection with past uses of the Property.
7. The closure status of Site 36 is still pending review by the EQB, according to its records. Due to the confirmed impacts of this facility on the soil and groundwater conditions of the Property it has been considered a REC in connection with past uses of the Property.

9.2. Site Reconnaissance

1. Several instances of stained soil or pools of liquid that suggest the presence or likely presence of any hazardous substances or petroleum products on a Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, ground water, or surface water of the Property were recorded at various locations (please refer to section 6.3 for details). As such, these are considered RECs in connection with historical and present uses of the Property.
2. Unidentified and labeled containers ranging from 1-gallon to 225-gallon plastic and metal units were observed at the several locations within the Property. No additional information regarding potential impacts to the soil and groundwater potentially brought about by releases at these locations is available. As such, they are considered RECs in connection with historical and present uses of the Property.
3. Use of asbestos-containing materials and lead-based paint as construction materials is widespread throughout most of the Property. It is considered a REC in connection with historical uses.
4. Various sites within the Property showed signs of filling or grading by non-natural causes suggesting solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal. These instances have been classified as RECs in connection with present and historical uses of the Property.
5. A structure of what appears to be a drainage channel system traverses the Viva Carpets / Metal Building Contractors building. This system is not in operation and most of the segments comprising it are covered with concrete slabs, preventing a thorough assessment of its purpose and condition. It has also been considered a REC in connection with historical uses.

9.3. Interviews

1. The interview component of this assessment identified the following RECs in connection with the Property:
 - i) Site 36 – Although thoroughly studied and characterized, closure status of this site is unknown.
 - ii) A 60-year old underground conveyance system used to distribute aviation and motor fuel to various facilities inside the Property appears to be still in place although abandoned decades ago.

- iii) The former PR General Services Administration gas station has two 25,000-gallon USTs that were never closed pursuant to EQB regulations. These USTs are leaking, according to the EQB database.

10.0. CONCLUSIONS

AGE has performed a Preliminary Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of a parcel of land identified as Parcel L, located within the Puerto Rico Convention Center District, in the Municipality of San Juan, Puerto Rico. The Property is subject to a due diligence process by the PRCCDA pursuant to the potential acquisition of this parcel of land. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property, except for the following:

1. The former PR General Services Administration gas station has two 25,000-gallon USTs that were never closed pursuant to EQB regulations. These USTs are leaking, according to the EQB database, which makes undertaking the closure of this facility a first-priority task.
2. The Autoridad de los Puertos de Puerto Rico (EQB Facility Number 2-920085) UST is considered a REC in connection with current uses of the Property, or adjoining properties, that warrants further study.
3. Based on historical data, two locations within the Property were used as disposal sites in the past. Specifically, the Miramar Equestrian School and the PR Fire Department Training Center sites warrant further characterization to assess the presence and extent of soil and groundwater contamination.
4. A 60-year old underground conveyance system used to distribute aviation and motor fuel to various facilities inside the Property appears to be still in place although abandoned decades ago. This structure represents a potential source of contamination to the soil and groundwater at the Property and would require further characterization.
5. The closure status of Site 36 is still pending review by the EQB, according to its records.
6. Several instances of stained soil or pools of liquid that suggest an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into the ground, ground water, or surface water of the Property have been recorded and warrant further investigation. Please refer to Section 8.0 for details.
7. Unidentified and labeled containers ranging from 1-gallon to 225-gallon plastic and metal units were observed at the several locations within the Property (please refer to Section 8.0 for details). No additional information regarding potential impacts to the soil and groundwater potentially brought about by releases at these locations is available and would require further investigation after proper characterization and disposal of these containers is achieved.

8. Use of asbestos-containing materials and lead-based paint as construction materials is widespread throughout most of the Property, prompting a Property-wide abatement program.
9. Various sites within the Property show signs of filling or grading by non-natural causes suggesting solid waste disposal, or mounds or depressions suggesting trash or other solid waste disposal and would require further characterization. Please refer to Section 8.0 for details.
10. A structure of what appears to be a drainage channel system traverses the Viva Carpets / Metal Building Contractors building. This system is not in operation and most of the segments comprising it are covered with concrete slabs, preventing a thorough assessment of its purpose and condition. It has also been considered a REC in connection with historical uses.

Registry ID: 110024280865 Environmental Interest/Information System ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

ASHFORD PRESBYTERIAN HOSPITAL (Continued)

1001818730

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:	D002

ACADEMIA PERPETUD SOCORRO (Continued)		1010787863
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.	
Waste code:	D003	
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.		1004591476

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D007

Waste name: CHROMIUM

Waste code: D039

Waste name: TETRACHLOROETHYLENE

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Historical Generators:

Date form received by agency: 03/09/2008
Facility name: MERINO BUILDING
Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FUDS Description Details:

This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and, therefore, may present an explosive hazard. Between 1898 and 1951, the United States acquired a total of 115.62 acres located in San Juan, Puerto Rico, for use as a Military Reservation called the Fort Brooke Military Reservation. Improvements existing on the site when the lands were acquired consisted of the El Morro and San Cristobal Fortresses and their associated works, in addition to numerous other improvements located throughout the site. The site remained active until 1955 when its functions were no longer required. On 22 August 1941, 1.31 acres were transferred from the War Department to the Treasury Department for the Coast Guard. Between 1942 and 1978, the remaining 114.31 acres were determined surplus and disposed of to other Federal agencies and the Commonwealth of Puerto Rico. A total of 45.07 acres were transferred to the Department of the Interior. A 4.95 acre parcel was transferred to the Department of the Navy and subsequently from the Navy to the Department of Interior, National Park Service, on 13 June 1973. By quitclaim deeds, 62.89 acres were conveyed to the Commonwealth of Puerto Rico. The site is still owned and utilized by the National Park Service, the Commonwealth of Puerto Rico, and the Coast Guard as park facilities, public buildings, governmental offices, and Coast Guard purposes. The site is an historically significant area and has numerous occupants.

FUDS History Details:

This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and, therefore, may present an explosive hazard. The lands were acquired from Spain by the Treaty of Paris on 10 December 1898. Originally, the site consisted of 98.83 acres. Between 1903 and 1951, the remaining acres were acquired through various transactions. Between 1941 and 1978, various portions of the property deemed excess were turned over to the Commonwealth of Puerto Rico, the National Park Service, and the U.S. Coast Guard. Improvements existing on the site when first acquired included the historic fortresses of El Morro and San Cristobal, whose construction had begun in 1539. The War Department and the Army constructed buildings, warehouses, houses, recreation facilities, sanitary sewer, water distribution and storm sewer systems, together with other miscellaneous improvements. Records and maps indicate that a bombing and gunnery training range was built and used by the Army from 1903 to 1975. During the period the site was under the jurisdiction and control of the Army, numerous areas were permitted to other Federal agencies and leased to the Commonwealth of Puerto Rico. The site remained active until 1955 when its functions were no longer required.

by Commonwealth of Puerto Rico against the U.S., the Commonwealth of Puerto Rico received title to 457.0263 acres and the U.S. received title to 42.9749 acres. The 42.9749 acres are still utilized by the Navy. The U.S. Coast Guard has use of a 41-acre housing area until it can relocate. The property is now being used for airport purposes, Commonwealth government agency administrative offices, and Coast Guard housing purposes.

FUDS History Details:

Between 1898 and 1968, the U.S. acquired the property for use as a Naval Air Base and for other naval activities. The site was developed and named the Naval Air Station, San Juan. The Navy constructed a complete Naval Air Station at the site consisting of 197 buildings including family housing, dispensary, school facilities, barracks, hangars, runways, wharfs, storage and supply structures, administrative buildings, and various utility facilities. The site was utilized until March 1971 when most of its functions were relocated elsewhere. During the period of Navy ownership of the site, portions of the site were granted to the Puerto Rico Ports Authority; to the U.S. Coast Guard; to a dry-dock and repair facility, to Department of Army for Puerto Rico National Guard purposes; and to the Commonwealth of Puerto Rico.

FUDS Description Details:

The site consists of 19.5 acres located in the ward of Manacilloa, municipality of Rio Piedras, 4 miles west of San Juan, Puerto Rico. The site served as a Navy hospital to accommodate naval personnel in the San Juan area during World War II. The entire 19.5 acres was disposed of by the U.S. Navy to Department of Health, Education, and Welfare (HEW) for disposal, who in turn conveyed the property to the Commonwealth of Puerto Rico in June of 1971. The site is still owned by the Commonwealth of Puerto Rico and is currently being used by the Health Department as a public Mental Health Center and also as a Civil Defense Regional Office.

FUDS History Details:

The Navy acquired the site between 1940 and 1942, developed and named the site the U.S. Naval Hospital Reservation, San Patricio. The site served as a Navy hospital to accommodate naval personnel in the San Juan area during World War II. The site consisted of a main hospital building, service building, recreation building, miscellaneous structures, paved streets, fencing, utilities and other improvements to make the site a fully operation hospital. After the conclusion of World War II, the Navy continued to utilize the facilities until 1970, when the site was disposed of and conveyed to the Commonwealth of Puerto Rico. The site is currently owned by the government of Puerto Rico and is being used as a public Mental Health Center and a Civil Defense Regional Office.

Environmental Interest/Information System		
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

CHEMTEX CARIBBEAN INC. ROAD 176, KM 9.5 SAN JUAN, PR	CERCLIS FINDS	1005904003 PRN000204365
CERCLIS:		
Site ID:	0204365	
Federal Facility:	Not a Federal Facility	
NPL Status:	Not on the NPL	
Non NPL Status:	NFRAP	
Site Description:	Chemtex Caribbean was a marketer of chemical products. The facility operated from 1962 to 1998. On February 5, 2002 the PREQB Superfund program conducted an interview with a neighbor, Mr. Roberto Pastrana. Mr. Pastrana indicated that the facility had several releases that affected the health of the residents of the area and contaminated a nearby creek utilized until then for fishing and recreational purposes.	
CERCLIS Assessment History:		
Action:	DISCOVERY	
Date Started:	Not reported	
Date Completed:	2/12/2002 0:00:00	
Priority Level:	Not reported

Environmental Interest/Information System US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

FINDS: Registry ID: 110007390260 Environmental Interest/Information System AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 03/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Source: EPA
Telephone: 202-564-4267
Last EDR Contact: 03/01/2010
Next Scheduled EDR Contact: 05/31/2010
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009
Date Data Arrived at EDR: 08/11/2009

Last EDR Contact: 02/09/2010
Next Scheduled EDR Contact: 04/12/2010
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009
Date Data Arrived at EDR: 09/02/2009

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 11/03/2009

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A	Source: EDR, Inc.
Date Data Arrived at EDR: N/A	Telephone: N/A
Date Made Active in Reports: N/A	Last EDR Contact: N/A
Number of Days to Update: N/A	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System		
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit

Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

FUDS Description Details:

This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and, therefore, may present an explosive hazard. Between 1898 and 1951, the United States acquired a total of 115.62 acres located in San Juan, Puerto Rico, for use as a Military Reservation called the Fort Brooke Military Reservation. Improvements existing on the site when the lands were acquired consisted of the El Morro and San Cristobal Fortresses and their associated works, in addition to numerous other improvements located throughout the site. The site remained active until 1955 when its functions were no longer required. On 22 August 1941, 1.31 acres were transferred from the War Department to the Treasury Department for the Coast Guard. Between 1942 and 1978, the remaining 114.31 acres were determined surplus and disposed of to other Federal agencies and the Commonwealth of Puerto Rico. A total of 45.07 acres were transferred to the Department of the Interior. A 4.95 acre parcel was transferred to the Department of the Navy and subsequently from the Navy to the Department of Interior, National Park Service, on 13 June 1973. By quitclaim deeds, 62.89 acres were conveyed to the Commonwealth of Puerto Rico. The site is still owned and utilized by the National Park Service, the Commonwealth of Puerto Rico, and the Coast Guard as park facilities, public buildings, governmental offices, and Coast Guard purposes. The site is an historically significant area and has numerous occupants.

FUDS History Details:

This property is known or suspected to contain military munitions and explosives of concern (e.g., unexploded ordnance) and, therefore, may present an explosive hazard. The lands were acquired from Spain by the Treaty of Paris on 10 December 1898. Originally, the site consisted of 98.83 acres. Between 1903 and 1951, the remaining acres were acquired through various transactions. Between 1941 and 1978, various portions of the property deemed excess were turned over to the Commonwealth of Puerto Rico, the National Park Service, and the U.S. Coast Guard. Improvements existing on the site when first acquired included the historic fortresses of El Morro and San Cristobal, whose construction had begun in 1539. The War Department and the Army constructed buildings, warehouses, houses, recreation facilities, sanitary sewer, water distribution and storm sewer systems, together with other miscellaneous improvements. Records and maps indicate that a bombing and gunnery training range was built and used by the Army from 1903 to 1975. During the period the site was under the jurisdiction and control of the Army, numerous areas were permitted to other Federal agencies and leased to the Commonwealth of Puerto Rico. The site remained active until 1955 when its functions were no longer required.

by Commonwealth of Puerto Rico against the U.S., the Commonwealth of Puerto Rico received title to 457.0263 acres and the U.S. received title to 42.9749 acres. The 42.9749 acres are still utilized by the Navy. The U.S. Coast Guard has use of a 41-acre housing area until it can relocate. The property is now being used for airport purposes, Commonwealth government agency administrative offices, and Coast Guard housing purposes.

FUDS History Details:

Between 1898 and 1968, the U.S. acquired the property for use as a Naval Air Base and for other naval activities. The site was developed and named the Naval Air Station, San Juan. The Navy constructed a complete Naval Air Station at the site consisting of 197 buildings including family housing, dispensary, school facilities, barracks, hangars, runways, wharfs, storage and supply structures, administrative buildings, and various utility facilities. The site was utilized until March 1971 when most of its functions were relocated elsewhere. During the period of Navy ownership of the site, portions of the site were granted to the Puerto Rico Ports Authority; to the U.S. Coast Guard; to a dry-dock and repair facility, to Department of Army for Puerto Rico National Guard purposes; and to the Commonwealth of Puerto Rico.

FUDS Description Details:

The site consists of 19.5 acres located in the ward of Manacilloa, municipality of Rio Piedras, 4 miles west of San Juan, Puerto Rico. The site served as a Navy hospital to accommodate naval personnel in the San Juan area during World War II. The entire 19.5 acres was disposed of by the U.S. Navy to Department of Health, Education, and Welfare (HEW) for disposal, who in turn conveyed the property to the Commonwealth of Puerto Rico in June of 1971. The site is still owned by the Commonwealth of Puerto Rico and is currently being used by the Health Department as a public Mental Health Center and also as a Civil Defense Regional Office.

FUDS History Details:

The Navy acquired the site between 1940 and 1942, developed and named the site the U.S. Naval Hospital Reservation, San Patricio. The site served as a Navy hospital to accommodate naval personnel in the San Juan area during World War II. The site consisted of a main hospital building, service building, recreation building, miscellaneous structures, paved streets, fencing, utilities and other improvements to make the site a fully operation hospital. After the conclusion of World War II, the Navy continued to utilize the facilities until 1970, when the site was disposed of and conveyed to the Commonwealth of Puerto Rico. The site is currently owned by the government of Puerto Rico and is being used as a public Mental Health Center and a Civil Defense Regional Office.

MIRAMAR DRY CLEANING AVE. FERNANDEZ JUNCOS #900 SAN JUAN, PR FINDS: Registry ID: 110007023407 Environmental Interest/Information System AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.	FINDS	1005524957 N/A

NORTH-SOUTH EAST-WEST PENNSULA DE CANTERA PHASE I, CONNECTOR SAN JUAN, PR FINDS: Registry ID: 110017694618 Environmental Interest/Information System US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. CHEMTEX CARIBBEAN INC. ROAD 176, KM 9.5 SAN JUAN, PR	CERCLIS FINDS	1005904003 PRN000204365
CERCLIS: Site ID: 0204365 Federal Facility: Not a Federal Facility NPL Status: Not on the NPL Non NPL Status: NFRAP Site Description: Chemtex Caribbean was a marketer of chemical products. The facility operated from 1962 to 1998. On February 5, 2002 the PREQB Superfund program conducted an interview with a neighbor, Mr. Roberto Pastrana. Mr. Pastrana indicated that the facility had several releases that affected the health of the residents of the area and contaminated a nearby creek utilized until then for fishing and recreational purposes. CERCLIS Assessment History: Action: DISCOVERY Date Started: Not reported Date Completed: 2/12/2002 0:00:00 Priority Level: Not reported Action: PRELIMINARY ASSESSMENT Date Started: 2/12/2002 0:00:00 Date Completed: 9/18/2003 0:00:00 Priority Level: Low priority for further assessment Action: SITE INSPECTION Date Started: 9/18/2003 0:00:00 Date Completed: 9/30/2004 0:00:00 Priority Level: NFRAP: No further Remedial Action planned FINDS: Registry ID: 110012536176

CHEMTEX CARIBBEAN INC. (Continued)		1005904003
Environmental Interest/Information System US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site. CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 03/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Source: EPA
Telephone: 202-564-4267
Last EDR Contact: 03/01/2010
Next Scheduled EDR Contact: 05/31/2010
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009
Date Data Arrived at EDR: 08/11/2009
Date Made Active in Reports: 09/21/2009

Last EDR Contact: 02/09/2010
Next Scheduled EDR Contact: 04/12/2010
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009
Date Data Arrived at EDR: 09/02/2009

Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 11/03/2009
Date Data Arrived at EDR: 11/05/2009

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 01/13/2010
Date Data Arrived at EDR: 01/15/2010
Date Made Active in Reports: 02/18/2010
Number of Days to Update: 34

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 01/13/2010
Date Data Arrived at EDR: 01/15/2010
Date Made Active in Reports: 02/18/2010
Number of Days to Update: 34

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

STATE AND LOCAL RECORDS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

	Data Release Frequency: No Update Planned

EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Picture 3. Annex building

Picture 4. Abandoned paint products, cleansers, adhesives, petroleum products.

Picture 5. Abandoned paint related products.

Picture 6. Evidence of oil stains on a floor section of the structure.

Picture 6. Evidence of oil stains on a floor section of the structure.

II. Property 2 – Viva Carpets & Home Warehouse

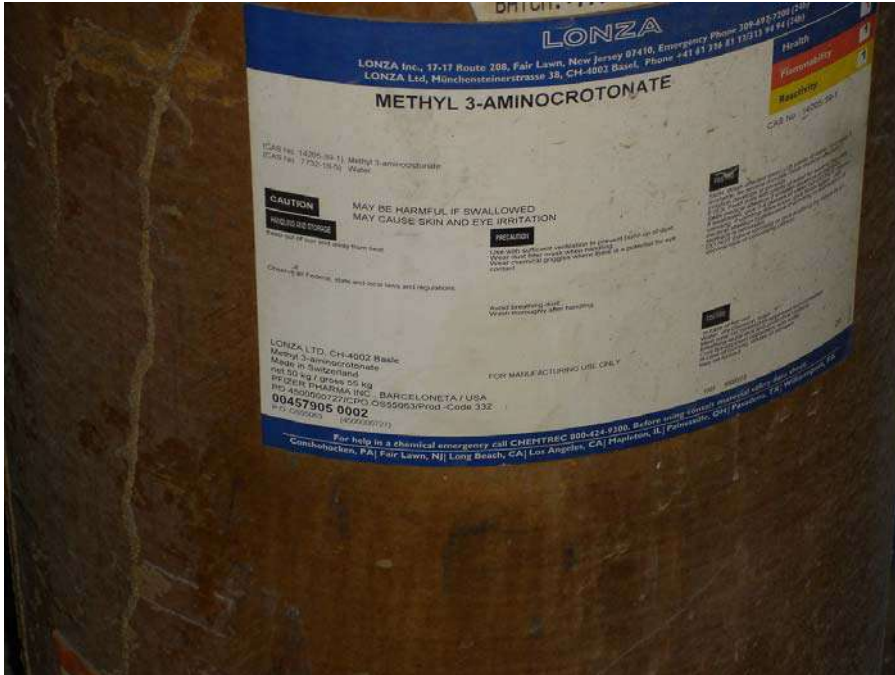

Picture 8. Main structure looking south.

Picture 9. Chemical storage area.

Picture 10. Methyl 3-Aminocrotonate spill at chemical storage area.

Picture 11. Close-up view of container label.

Picture 12. Annex building looking south.

Picture 13. Photo of Signal Corps register cap located west of annex building.

Picture 14. Concrete tank located north of the site.

Picture 15. Underground drainage system covered by concrete slabs.

III. Property 3 – Metal Building Contractor Inc.

Picture 16. Site view looking east.

Phase I ESA at Remnant Parcel from "Commonwealth Parcel"
Including Parcel 200-2 at the PR Convention Center District

Picture 17. Another view of the main storage facility.

Picture 18. Paint-related material mixed with petroleum product materials and other products.

Picture 19. Paint-related material dumped at the site.

Picture 20. Propane Gas storage tank located south of the structure.

Picture 21. Construction and paint-related material storage inside the main building.

Picture 22. Construction debris deposited next to Property 1.

Picture 23. Oil stained asphalt observed close to the electrical sub-station.

Picture 24. Stained soil observed close to the electrical sub-station.

IV. Property 4 – La Casa del Techero Inc.

Phase I ESA at Remnant Parcel from “Commonwealth Parcel”
Including Parcel 200-2 at the PR Convention Center District

Picture 25. Main structure looking south.

Picture 26. Outside storage.

Picture 27. Roof sealing products storage inside the building.

Picture 28. Roof sealing products storage inside the building.

Picture 29. 55-gallon unlabeled metal drums stored outside of the main building.

V. Property 4 – Former Puerto Rico General Services Administration
Gas Station

Picture 30. Main structure looking east.

Picture 31. Accumulation of debris inside main structure.

Picture 32. Accumulation of waste inside main structure.

Picture 33. UST cap within the property.

VI. Property 6 - Precision Marine

Picture 34. Accumulation of chemical used at this facility. Most of the products are petroleum-related products.

Picture 35. 55-gallon drum located north of the main structure.

Picture 36. 55-gallon drums in bad condition located north of the main structure.

Picture 37. Close-up view of the previous picture.

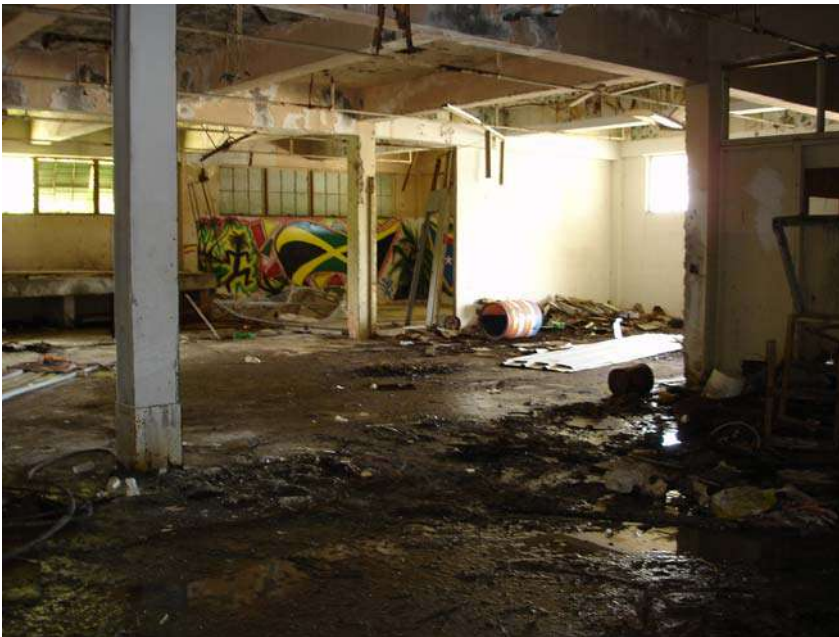

Picture 38. Stained soil next to abandoned drums.

VII. Property 7 - Puerto Rico Port Authority (SIAAME)

Access to this location was not authorized by the PRPA.

VIII. Property 8 - Former Commissary and Navy Exchange (Abandoned)

Picture 39. Accumulated debris inside the abandoned structure.

Picture 42. Metal drums and other containers abandoned north of the site.

Picture 43. Significant amount stained earth crust materials north of the site.

Picture 44. Solid waste accumulation north of the main structure.

Picture 45. Another view of the disposal site located north of the main structure..

Picture 46. A truck from the Puerto Rico Port Authority dumping waste at this site.

Picture 47. Alternate view of the truck that disposed debris at the site.

IX. Property 9 - Caribe Techno Corporation

Picture 48. Significant accumulation of debris south of the main structure.

Picture 49. Alternate view of accumulation of debris south of the main structure.

Picture 50. Interior view.

X. Property 10 - Trans Caribbean Marine

Picture 54. Trans Caribbean Marine entrance.

Picture 52. Partial view of the inspected areas.

Picture 53. Abandoned containers within the site.

Picture 54. Electric transformer full of what appears to be dielectric oil.

Picture 55. Oil and lubricant dispensing station.

Picture 56. Absorbent material over stained soil at solvent wash station.

Picture 57. Stained concrete floor.

Picture 58. Used oil storage container. Stained concrete can also be seen.

Picture 59. Additional unlabeled containers.

Picture 60. Used oil spill over the concrete floor at drum storage area.

Picture 61. Stained oil at the site.

Picture 62. Another view of oil-product impacted soil.

Picture 63. Alternate storage area with significant accumulation of oil-related products.

Picture 64. Stained concrete surface.

Picture 65. AST within the property.

Picture 66. More petroleum-product impacted areas.

XI. Property 11A - Former Pan American Olympic Gymnasium
(Abandon)

Picture 67. Property interior.

Figure 68. Wood pallets can be observed east of the building.

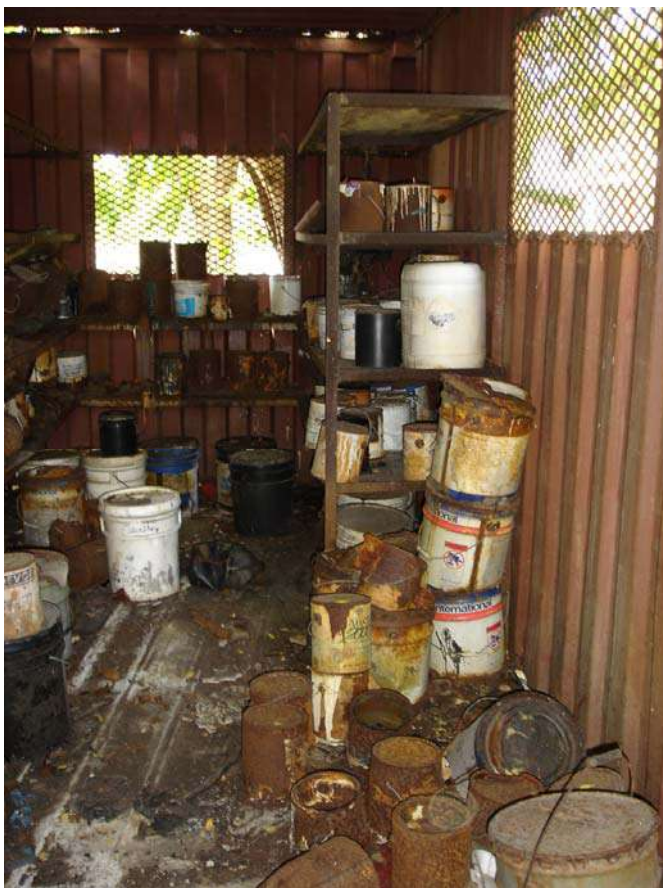

XII. Property 11B – Parking Lot

Picture 69. The site had been covered with asphalt and was used as a container yard.

Picture 70. Combustible Flammable Storage sign found at a cargo container located northeast of the site.

Picture 71. A significant amount of paint products was found inside this cargo container.

Picture 74. Alternate view of the situation shown in the previous picture.

XIII. Property 12 – Abandoned Structure

Picture 75. Main structure looking north.

Picture 76. West side of the main structure.

Picture 77. Interior of the structure.

XIV. Property 13 – Former Marines Barracks (Abandoned)

Picture 78. Main structure looking south.

Picture 79. Structure showed signs of fire damage.

Picture 80. Vinyl floor tiles may contain ACMs.

XV. Property 14 – Former Marines Barracks (Abandoned)

Picture 81. Front view of the site.

Picture 82. Vinyl floor may contain ACMs.

Picture 83. Abandoned metal drum containing an unidentified liquid.

Picture 84. Vinyl tiles at the main structure may contain ACMs.

XVI. Property 15 – Former Marines Barracks (Abandoned)

Picture 85. Main structure looking north.

XVII. Property 16 – Former Marines Barracks (Abandoned)

Picture 86. Vinyl floor tiles.

Picture 87. Ceiling tiles may contain ACMs.

Picture 88. Accumulation of paint related products inside the main structure.

XVIII. Property 17 – Former Banco Popular

Picture 89. Ceiling roof tiles.

XIX. Property 18 - Former Bomberos de Puerto Rico

Picture 90. Vinyl floor tiles are present throughout most of the building.

Picture 91. Vinyl floor tile at another location on the first floor.

Picture 92. Abandoned electrical sub-station west of the main structure.

XX. Property 19A – Concretera de Puerto Rico

Picture 93. Sign showing EQB permit and name of the project.

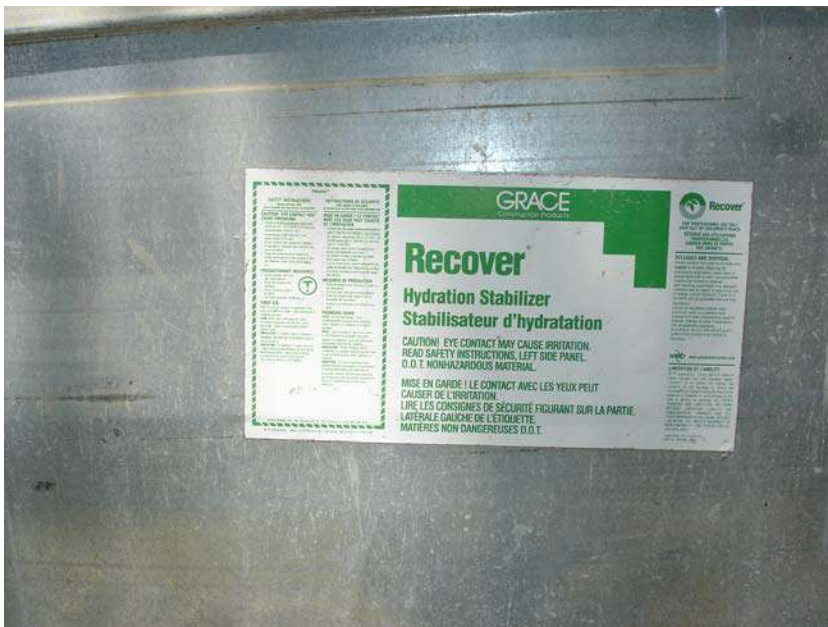

Picture 94. Abandoned AST and electric generator.

Picture 95. One of the chemicals used in connection with the concrete mixing plant.

Picture 96. Another of the chemical products used by this operation.

Picture 97. The concrete mixing operation included various chemicals such as the one shown in this label.

Picture 98. Various 55-gallon drums were observed containing residues of unknown materials.

Picture 99. Another example of abandoned containers at the site.

Picture 100. Concrete mixing plant.

XXI. Property 19B- Del Valle Construction

Picture 101. More than 70 55-gallon drums, mostly unlabeled are accumulated at the southeast corner of this site.

Picture 102. Alternate view of the approximately 70 drums containing unidentified residues.

Picture 103. AST and Water tank.

Picture 101. Another view of the extensive accumulation of unlabeled containers at this location.

Picture 102. Debris generated and accumulated at this location.

XXII. Property 19C – Empty lot near Pier 15 and Pier 16
